Comments for Public Posting: CDC Director Dr. Rochelle Walensky has admitted a "dramatic mistake" and "resetting" the agency's reaction to Covid-19. Dr. Walensky further admits that "We need to recognize that in our big moment, our performance didn't reliably meet the expectations of this country, and that's exactly why I called for this 'reset,' why I called for this review. The CDC admits that it made pretty public (faulty) mistakes from testing to data to communications. (Aug 23, 2022) The Biden Administration has ended its Covid-19 Testing Aimed at Unvaccinated Workers (Aug 17, 2022). The state of CA on its webpage (covid19.ca.gov) shows Masks are no longer required indoors in California, with a few expectations, as of April 22, 2022. There is no longer a "State of Emergency." Meeting in person DOES NOT present greater imminent risks to the health or safety of attendees because of the continuing state of emergency. Those exposed to the virus are no longer required to quarantine. Unvaccinated people now have the same guidance vaccinated people. Students can stay in class after being exposed to the virus. It's no longer recommended to screen those without symptoms. (Aug 11, 2022) Social distancing and masking have been removed as a safety measure by the CDC. Findings to Continue Teleconference Meetings Pursuant to AB 361 and Related Actions are simply no longer necessary they never were. In person council meetings have occurred for a couple of months now without any issues. City workers have worked throughout the pandemic in person without proper PPE. Enough with the tyranny, enough with the mandates, return all city workers to work, allow residents to return to normal life and be involved in their government. End the state of emergency and all mandates now.

Comments for Public Posting: Follow the science and the CDC recommendation to treat vaccinated and unvaccinated equally and end the Declaration of local emergency. The City of LA is no longer cutting edge, but instead lagging behind the rest of the country. Local emergency is no longer justified. End it immediately.

Comments for Public Posting: There is absolutely no need to continue this facade that covid19 should prevent in person and fully public meetings of the city council. City employees, especially Police and Fire have been in public contact every day since the pandemic declaration. As for public safety, the LAPD cannot meet staffing goals and you're still firing tenured people for not taking an ineffective and dangerous medication! Drop the senseless vaccine mandate and you might get some more applicants.

Comments for Public Posting: Our home has been stolen from us, not by our tenants, but by the overly broad policies created under Mayor Garcetti and upheld by the City Council. The policies fail to focus on those who actually need help, but instead let people take advantage of family's like ours. And yet our home is not the only thing being stolen from us. Our savings has been stolen from us as we pay rent for these tenants and our own as well. Our hard work has been stolen from us as our income does not even cover half of our homeowner costs with no recourse to regain possess or raise rents. Our time has been stolen from us as we have spent countless hours appealing to the City Council only to be ignored or pushed aside. Our health as been stolen from us as we have waited for over 30 months for the City to do the right thing and not abuse their powers. All we want to do is to make choices for ourselves and our own home, but instead it is being stolen from us. The City should be helping those in need, but instead since they cannot be bothered to fix their broken policies, they are letting people take advantage of us.

Comments for Public Posting: I think what the City Council and LAHD fails to see is if a tenant cannot pay 1-2 months of rental arrears they definitely will NOT be able to pay 32-months of rental arrears. What is the City Council's response to its broken policy of no repercussions to tenants for skipping out in the dead of night the day before the expiration of its 12-month repayment period? Even if somehow the City decides to forgive by subsidizing tenant arrears for the entire moratorium this does not fix anything. The landlord-tenant relationship has already been destroyed by the City's broken policies. The landlords that wanted to work with their tenants already have and those cases worked out for both parties. The other cases with abusing tenants will never be the same again. As much as the City Council wants to eliminate displacement, that is not a real solution, eviction is a normal part of the housing process. Problem tenants need to go as no amount of forgiveness will make it right. The City Council needs to recognize its policies are broken and that it is time to move on and stop scapegoating the small mom and pop landlords that kept everybody housed during the 'covid emergency'

Comments for Public Posting: Item 15 should not be approved. Meeting in person is essential to allow the public to be heard. Covid 19 is here to stay and is no worse than a common flu now. The city has preached to follow the science, well then you should be following CDC's guidelines.
