Just saw great article proposing that LA house the homeless in unused hotel rooms. I think you need to test this in a smaller scale by housing them at the city council members homes for a period of 6 months to see how well it would work. Then it could be expanded to Nancy Pelosi's home and all of your pathetic federal representatives! Sanctuary cities add so much to our society, don't you agree?
Like our environment, it's only a matter of time for LA, San Francisco and Oakland.
