Comments for Public Posting: As a long time activist, animal advocate and environmentalist, I am profoundly concerned with the current stresses under which our earth is reeling and do all in my personal life to address the inevitable disruptions to the health of the land, sea and air by treading as lightly on all as is possible. I adopted a plant based diet many years ago as I did not wish to become complicit in the gross suffering of farm-raised animals and attendant pollution of air, water and land and farm workers exploited in this Industry. I am very pleased with my nutritious options, especially those items now lab. raised and am following the advances in the Good Food Initiative with enthusiasm. Our human populations are growing, our climate is in crisis and the current use/abuse of the earth's resources is unsustainable. Any moral individual cannot stand by in deliberate indifference or willful ignorance to these disruptions and degradations, so I write in strong support of the Plant Based Treaty which was introduced by Councilmembers Paul Koretz and Marqueece Harris- Dawson Sept. 6'22.
