Agenda Date:
Item Number:
Summary: The Board of the Studio City Neighborhood Council (SCNC) supports Council File 22-0779: Title, Cyber Attacks / Critical Infrastructure / Artificial Intelligence / Cybersecurity / Defense Advanced Research Projects Agency (DARPA) / National Security Commission on AI (NSCAI). In the past year, large cities across the United States have been targeted by state-sponsored and other malicious cyber actors that threaten the public's security and privacy. It is worrisome that the City of Los Angeles' critical infrastructure is potentially at risk, including departments such as the Department of Water and Power, Port of LA, and the Police and Fire Departments. It therefore makes sense for the City's Information and Technology Agency to report to the City Council on security measures and protocols that are in place to detect cyber-attacks, and that the report include a comprehensive review of the City's IT asset management capabilities and recommendations for improvement.
