Comments for Public Posting: - This is a historic opportunity for City Council to endorse a resolution that would set a precedent for large cities across the nation and world. - Endorsing the Plant Based Treaty is a measurable step toward protecting our ecosystems, mitigating the climate crisis, and lessening the suffering of millions of farmed animals. - The Plant Based Treaty encourages a shift to healthier, more sustainable plant-based diets and lifestyles, which is beneficial to humans, farmed animals, and the environment. Please share the link and talking points above with friends and family to maximize the number of people who write in to show their support. In Defense of Animals will also be launching a campaign in the next few weeks where you will be able to show further support of the resolution by contacting council members directly. The Plant Based Treaty is a companion to the United Nations Framework Convention on Climate Change (UNFCCC)/Paris Agreement, which targets food systems to combat the climate crisis. The Treaty aims to halt the widespread degradation of critical ecosystems caused by animal agriculture, to promote a shift to more healthy, sustainable plant-based diets, and to actively reverse damage done to planetary functions, ecosystem services, and biodiversity.

Comments for Public Posting: The plant based treaty idea is a win win, I believe for everyone. It will help our climate crisis. Eliminate animal suffering. No longer have to clear forest and land to breed more helpless animals for consumption that are now pumped with so many things and not even fed naturally. It is a no brainer that vegetables and fruits are so much better for our health. Will help to eliminate obesity and diabetes and heart disease and so much more. Please endorse the plant based treaty.

Comments for Public Posting: Animal agriculture is one of the most destructive industries on the planet and we are literally eating ourselves, plus untold other species, out of house and home with our seemingly insatiable appetite for animal products. We need to transition to a compassionate, efficient, sustainable and healthy plant-based food system . . . for the other animals, the planet and ourselves. I encourage Los Angeles to endorse the Plant-Based Treaty.
