Council File No: 20-0291

Comments for Public Posting: Item 10 and General Public comment. Today's vote determines whether to extend the emergency as it was originally proclaimed. If an emergency is based in pseudoscience, then it will always be based in pseudoscience and will be extended indefinitely until someone says NO MORE. The emergency orders must be rescinded immediately. I have experienced firsthand, the ways that the leaders of our city will use the emergency orders to develop legal subterfuges that segregate certain demographics of speakers out of Live Oral Public Comment. The Requirement to hold Live Oral Public Comment to be only accessible in person while the city hall is still segregating its entrances, is a violation of our FIRST AMMENDMENT right to Redress, and freedom of expression. The Brown Act states there should be NO REQUIREMENTS to attend the City Council meetings and that everyone should have access to address the Council members in Real Time. These meetings are violating the U.S. Constitution.

GENERAL

Public Comment: JUST BECAUSE the vaccine-proof ordinance doesn't single out skin color doesn't diminish the force of the FACT that these policies are sanctioned Segregation. To paraphrase Pauli Murray when she equated the evil of sex discrimination with the evil of racism... "The manifestations of racial prejudice have been more brutal than the more subtle manifestations of prejudice by reason of sex, in no way diminishes the force of the equally obvious fact that the rights of women and the rights of Black people are only different phases of the fundamental, indivisible issue of human rights." As she states all those years back, "We are entering the age of Human rights." We the people DEMAND a redress of the most recent phase of segregation in our Modern History. We DEMAND an end to the discriminatory vaccine-proof ordinance! GOD BLESS AMERICA.
