

# TRANSPORTATION

## MOTION

Victory Boulevard is a typical example of a wide San Fernando Valley arterial that lends itself to excess speeding. This corridor is also on the Department of Transportation's High-Injury Network as part of the Vision Zero Program. Over the past 18 months, multiple cars traveling at incredibly high speeds have crashed along the segment between the 405 Freeway and Sepulveda Boulevard, damaging personal and city property and nearly injuring bystanders. Improvements need to be made on this stretch to protect residents from crashes and reduce speeding.

**I THEREFORE MOVE** that the Department of Transportation and Bureau of Engineering create a plan within the next 30 days for safety improvements along Victory Boulevard between the 405 Freeway and Sepulveda Boulevard in consultation with the surrounding community. This should include:

- Speed reduction improvements such as speed tables.
- A barrier at Blucher Street to prevent cars from crashing into homes.
- Pedestrian Safety enhancements.
