Comments for Public Posting: As an employee of the City of Los Angeles, DWP, I respectfully request that the City Council rescind the ordinance #187134 mandating all city employees be injected with an EUA, experimental vaccine for the covid -19 virus. The data is collected and there are multiple peer reviewed studies from medical and health professionals worldwide disproving the efficacy of these injections. There is irrefutable evidence that the injections are dangerous and life threatening to some people. I respectfully request the council rescinds this dangerous and possibly deadly ordinance 187134.

Comments for Public Posting: Hear Buscaino's proposal to end the mandates. Stop being tyrannical despots and actually try to represent your constituents.
