Comments for Public Posting: I urge all City Councilmembers to vote in support of the Plant Based Treaty and all initiatives at all levels of government that encourage and facilitate movement away from the animal-based food supply in favor of a plant-based food supply. This really is a no-brainer. The contribution of the meat and dairy industries, both in the U.S. and internationally, to climate change and global warming is frightening. The LA City Council can and should separately legislate that all City-funded catering should be heavily skewed to plant-based meals. One should not have to request a non-animal based meal but rather if a person has a medical need for animal protein, the practice should be that person can request a special meal while the rest of the event is catered plant-based.

Comments for Public Posting: As your constituent, I respectfully ask that you vote “yes” to endorsing the Plant Based Treaty for the city of Los Angeles. This is a historic, precedent-setting opportunity for the city to harness efforts to tackle the climate crisis, help repair intricate ecosystems, allow local biodiversity to regenerate, and to address animal agriculture as a leading cause of environmental collapse and animal cruelty. Endorsing the Plant Based Treaty would be a monumental achievement and would blaze a trail for other large cities across the world to join in on similar environmental and animal protection measures. Thank you for your time and consideration.
