Comments for Public Posting: I believe California, Los Angeles in specific can truly lead the way in making our planet healthier and more sustainable. We only have one earth. Rather than trying to find ways off of it and creating more pollution by trying to discover new ones, we need to focus on how to reverse and reduce the damage we've done to our home. Extreme weather and sickness is only the beginning if we don't step up now.

Comments for Public Posting: Please endorse the plant-based treaty! Studies demonstrate that a shift to plant-based diets could lead to substantial reduction of greenhouse gas emissions as compared to current dietary patterns. Shifting diets from meat and other animal products to plant-based diets has a high potential for reducing carbon footprints and mitigating climate change, as well as improving human health, according to Climate Change 2022: Mitigation of Climate Change, a new report from the United Nations' Intergovernmental Panel on Climate Change. We need this change!

Comments for Public Posting: This type of treaty should have happened back in the 1970s when Congress was first informed of the dangerous impacts of climate change from the fossil fuel industry. Big Ag saw that and has tried to do everything it can to hide the devastating effects that the industrialized animal ag industry also has on the environment, which emits more emissions than every tail pipe on all cars, trucks, motor bikes, airplanes, & ships combined. Los Angeles will not only protect our citizens & the environment with this treaty, but it will also help inform the billions of people around the world who are still unaware of how our broken food system has been destroying our planet. Cruelty-free, plant-based meals are not only proven to be healthier for us, they are a much more ethical way to treat animals and stop supporting the mass murders happening every second at factory farms across the world. Thank you for passing this trail-blazing treaty.

Comments for Public Posting: We need this to survive, for our environment and the future of our planet, humans and other beings. A large portion of the citizens support and want change. It is crucial that we adapt to survive. A plant base diet it's easy to obtain once we been educated and informed. Please listen to us, our voices must be heard. We have to take big measurements to survive and save the planet.

Council File No: 22-0002-S118

Comments for Public Posting: Our planet Earth and its residents, are in need for you to endorse the Plant Based Treaty. If you truly want to turn back the clock on global warming you must endorse this. Animal agriculture is a huge contributor to global warming, as much as (or more so) fossils fuels and the industries attached to it. Along with the cruelty it inflicts on the millions of sentient beings being slaughtered and in pain/scared. Please endorse the plant based treaty! We just all want to stay alive, thank you!

Comments for Public Posting: It is so important for cities to support the Plant Based Treaty and initiatives that will offer solutions to the current climate crisis! Our food systems are playing a huge part in this crisis and must be addressed. We need cities around the globe to join forces in putting pressure on national governments to take this crisis seriously! There is strength in numbers and we need Los Angeles City Council to use its voice to speak up and take action! Please support this campaign and endorse the Plant Based Treaty as a city! Thank you!

Comments for Public Posting: As a lifelong LA resident, California Naturalist, and Climate Reality Leader who would like to see better health outcomes for our community, I am writing to support that LA formally endorse the Plant Based Treaty. Besides phasing out fossil fuels, I urge us to work together to reassess our unhealthy food/agricultural system - which currently relies heavily on fossil fuels (pesticides, fertilizers, transportation, etc.) and intensive animal agriculture that all together contribute to 24% of global GHG emissions. Through speaking with my family members, I recently learned that my ancestors rarely ate meat. Instead, they primarily had a diet of fresh fruits and vegetables - which was important nourishment for them to be healthy and vibrant. By endorsing a plant based treaty and moving towards a healthier diet of fresh, organic whole foods for all, we can work together to bring back health to our communities. Thank you for your time and consideration.

Council File No: 22-0002-S118

Comments for Public Posting: Passing the plant based treaty is a rare opportunity to make a huge difference in mitigating climate change. The science on this issue is crystal clear. It's not just a matter of global warming but also an important part of resource management. This is perhaps the most powerful action the city of Los Angeles can take to preserve water reservoirs. Additionally, the impact that LA would have is compounded when we consider the influence this would have on other cities to follow suit. Please listen the the voice of this generation and that of the future by passing the Plant Based Treaty.

Comments for Public Posting: Good evening, I feel that wherever we are in the world animal Agriculture has caused an adverse negative affect on the climate surrounding us. A sustainable plant based lifestyle and transition in to plant based farming with severely lower carbon emissions and the disastrous level of greenhouse gas created affecting the planet and our home. I hope this treaty will pass in the long run and provide the next generation with the world we all deserve.
