Comments for Public Posting: Thank you for taking positive climate action! A city as large as Los Angeles will be a trailblazer for the rest of the country and beyond to take the climate crisis seriously. It is time for governments to acknowledge the harms of animal agriculture on our planet and take action to make plant-based meals more accessible and available to all.

Comments for Public Posting: I'm a City of Los Angeles voter, and I support the plant-based treaty. Our purchasing policies should not center around unhealthy foods and environmentally unsustainable animal agriculture expansion. We also need to be mindful of our reoccurring droughts and what kind of land-use decisions we are promoting with purchasing policies.

Comments for Public Posting: We got to stop eating animals it's destroying everything that we love and enjoy and soon we may not even have a planet to live on and the future is lost forever. Do you really want to die and harm many people I don't think you do so stop eating animals and switch to plant based. It's also healthier than meat and dairy they kill you. plants don't.
