Comments for Public Posting: The public deserves to be led and educated in this way about how dangerous it is for people and the planet to not massively reduce the consumption of animal products and reduce animal agriculture. Lead by example and proactively educate the public to sway opinion toward people choosing a plant based diet

Comments for Public Posting: The PLANT-BASED TREATY is an URGENT SOLUTION to the climate disasters this planet is facing that in large part caused by ANIMAL AGRICULTURE. Humans are in the midst of creating the Sixth Mass Extinction if we do not take action NOW to reverse this climate crisis. Biodiversity, forests, land, soil, air, water, ocean and tens of thousands of species are dying at unprecedented in our own lifetime. tens of millions of people dye every year from diseases caused by meat & dairy consumption. We can not afford to wait any longer while the public finds blame with only fossil fuels. Animal Agriculture is a toxic industry devastating every aspect of future of life. Animal Ag must end & be replaced by the plethora of healthy alternative proteins already in full realization for a global market. With remarkable successes, globally, thousands of Animal Farms are already transitioning away from animals to 100% sustainable mycelium & high yield plant crops. This transition insures farmers can maintain their land, their livelihoods & increase profitability and thrive with clean, resilient, healthy crops. The PLANT BASED TREATY is a WIN WIN for people, animals, and the planet!!

Comments for Public Posting: I spent a long time writing a detailed comment only to have my phone battery drain before sending. I will rewrite but the gist of it is... please do everything within your power for the present and future of animal welfare, animal rights. Correct the abuses and hold the perpetrators accountable, zero tolerance. Factory Farming is contributing to global warming and a host of other intricate health issues amongst humanity and wildlife. An end needs to be put to Factory Farming of animals. A complete end.
