Comments for Public Posting: The only place I have experienced a bike crash in 14 years riding in Los Angeles, was on Sunset Boulevard. A driver opened his car door and I crashed into it. Current bike lanes provide an illusion of safety. In Washington DC, in New York City and other cities across the United States and around the world protected bike lanes have transformed the communities. Angelenos deserve this as well. I want to be able to bike with my children to school and other activities between Echo Park and Hollywood. But right now I don't feel safe riding with them because I know personally how dangerous it can be.

Comments for Public Posting: I endorse the motion 22-1072 introduced by Council District 13 in support of Sunset4All, the community's vision for safer, more prosperous, and more sustainable Santa Monica and Sunset Boulevards. We Los Angelenos deserve safer streets for walking and biking!

Comments for Public Posting: We should make the Sunset4All project a high priority. Done promptly, it can serve as both an example and template for how best to reduce cyclist and pedestrian injuries and fatalities, use active transportation to help meet our climate goals, and to reduce car traffic, all while beautifying the streetscape. Please urge LADOT, BOE and StreetsLA to provide their implementation recommendations for Sunset4All as soon as possible.

Comments for Public Posting: I support a Sunset for All. Please consider making Sunset Blvd a great street for walking and biking, by having less space given over to driving and parking. Thanks!

Comments for Public Posting: Make Sunset a bike-friendly and more pleasant street! Right now it is a sewer of cars. We are falling farther and farther behind other communities, especially outside the USA. We say we care about Climate Change and the environment, we say we care about safety and livability, so let's just do this already. So many people would love to get out of their cars and on to a bike if they felt it were safe to do so!!!

Comments for Public Posting: As a resident of CD13, I enthusiastically and unconditionally support the Sunset 4 All project. Creating safe bike lanes throughout the city is of the utmost necessity, and this project perfectly delivers. The current bike lanes on Sunset offer no protection from speeding car traffic, and these proposed protected bike lanes would provide a vital safe transportation corridor throughout our district and into others. I wish that it extended all the way into downtown as well! I urge all councilmembers to support this project and expedite it through the planning, design, and implementation. If Los Angeles is serious about providing safe and healthy transportation alternatives to driving, we need more protected bike lanes everywhere. Sunset 4 All is a great place to start.

Comments for Public Posting: With its flat terrain and warm climate, Los Angeles is the perfect city for bicycling, yet too often it seems instead to be a city built for cars. We should never forget that it's human beings, not cars, who live here. Biking and walking are healthy pursuits that benefit the social fabric of a city as well as its environment, and deserve to be encouraged, especially on major commercial arteries like Sunset Boulevard. A flourishing Los Angeles must include window-shoppers strolling about, families pedaling to the park, all enjoying a bounty of nature -- and beneficial infrastructure.

Comments for Public Posting: I strongly support the Sunset 4 All proposal and urge the council to act with urgency to implement this plan along with other mobility improvements city-wide. I am a resident of CD13 and have had way too many close calls with impatient drivers while crossing in a crosswalk on foot or when riding my bike, especially along Sunset. Being put in danger by impatient or downright reckless drivers is sadly an almost daily occurrence. Our streets are unfortunately deadly by design, and I strongly support all efforts to make getting around our city easier, safer, healthier, and more sustainable.

Comments for Public Posting: As I ride up and down Sunset Boulevard, for many reasons: shopping, dining, visiting friends, visiting Hollywood, visiting Kaiser Permanente, I am always on high alert! Even at times I see other bicyclists riding towards me in the bike lane... all of these experiences create a recipe for disaster! Therefore, I support wholeheartedly, a two way, protected bike lane on Sunset Boulevard. Please vote yes!

Comments for Public Posting: I enthusiastically endorse the motion 22-1072 introduced by Council District 13 in support of Sunset4All, the community's vision for safer, more prosperous, and more sustainable Santa Monica and Sunset Boulevards by: 1. Installing 3.2 miles of bi-directional, parking protected bike lanes that will safely, efficiently connect ~100,000 local residents to the subway and thousands of subway riders directly to our businesses. 2. Adding pedestrian amenities such as improved sidewalks, better crosswalks, beautification, and shade trees to make the corridor a more pleasant place to walk, dine, and shop. 3. Transforming a vision zero high injury network corridor into safe routes to schools, parks, and libraries for local families. 4. Improving transit infrastructure to increase mobility and bring more customers to our business' front doors. 5. Additionally we support City of LA staff working with Sunset4All crowdfunded engineers Rock Miller and GTS Engineering to support the innovative design of the project. Thank you for your time and consideration.

Comments for Public Posting: Many more Angelenos ride bikes to get around today than did twenty years ago and yet the streetscape remains largely the same. Protected bike lanes will get more people out of their cars and onto their bikes, improving traffic flow, air quality and quality of life for those fortunate enough to get around LA by bike! Sunset Blvd, like a lot of the city, is more treacherous for bike riders than it needs to be. There are simple, practical fixes in the Sunset4All plan. Let's get them done!
