Comments for Public Posting: The quality of air in our neighborhood is devastating! We woke up on the night of September 20th around 4:00 am from horrible gasoline smell that was coming from the window. It's needless to say that loud engine noises gave us the clue where the smell was coming from! We are being poisoned by VNY day and night! We felt like we were showered with jet fuel the smell was so intoxicating! We need further investigation and studies on how VNY increase of traffic is affecting life of simple people living in this neighborhood.
