Comments for Public Posting: I really do not understand why you still keep with tenant protection ordinance. With this legal ordinance, your are taken away food from my kids, from my retired mother and my mother in law too. You think of tenants as the only one affected by pandemic, but you should understand that everyone was affected by pandemic, my husband work hours were cut, with your measure you cut rent income. I really do not know if coronavirus excluded you. Politicians could keep their salaries because we did paid our taxes. You should think that now your are not only taken away rent income from landlord but also from state and federal taxes. If we, landlord, do not receive rent income, we could not pay taxes, you also are jeopardizing the allocation of money in state and federal budget. . If tenant could have any sense of moral and ethics, they should be paying whatever amount of money instead of \$0.00; or they should not be retaining the help from CA covid-19 rent relief. They are just taking advantage of the opportunity you are giving to them. If you have the good heart and want to help them, you should do it from your pocket and not from other people pocket. When you keep this ordinance you are protecting only one group of people and not thinking in the wellbeing of the population in general. You are there to govern everyone and not to favored one group.
