**Comments for Public Posting:** Hi, as a lifelong Angeleno who has experienced massive inefficiencies when vehicles drive/park illegally in bus and bike lanes, I support automated enforcement to get cars out of bus lanes. Not only is this inefficient for all road users, but it also poses a great danger to people who use dedicated bus and bike lanes, as these cars become a obstacle on the road. Automatically ticketing parked cars is a great first step. I support the plan and urge that it move forward quickly.

**Comments for Public Posting:** I support enforcement of bus-only lanes in Los Angeles. We currently have too few bus lanes given the amount of traffic and the insufficiency of our public transit system, and the ones we have are frequently blocked illegally by cars. We need to follow the lead of other cities in implementing automated enforcement to get cars out of the bus lane. I support this plan, and I encourage it to move forward quickly.
