Comments for Public Posting: It is time to implement the minimum 15 miles of protected bike lanes in the mobility plan for CD 13. The plan has been set since 2015. In a time of rising gas prices and inflation, it is important to give the public more, safe, transportation options. Riverside Drive should have more protected bike lanes and CD 13 has the ability to implement.

Comments for Public Posting: Hi, as someone who would like to see better safety and public health outcomes in our community, I support installing protected bike lanes on Riverside Dr east of Fletcher to Elysian Park along Stadium Way. Doing so will help implement part of the mobility plan that Council District 13 has planned in the mobility plan (currently 0 miles of protected bike lanes has been implemented). Unfortunately, 814 cyclists have been injured and killed in CD13 since the mobility plan was adopted in 2015. Let's work together to diversify the transportation in our communities and deliver better safety for all. Thank you.

Comments for Public Posting: We have several important bike routes in CD 13, but all are unsafe from fast moving traffic and opening doors. I hope we can protect those lanes and add many more. These protected paths would allow me and many others to cut out nearly all our car trips and stop more at local businesses rather than just drive past them. Of the highest importance is linking these paths. It makes no sense that the route from the reservoir path to the river bike path stops just a few dangerous blocks before linking. That no protected route from Sunset to any subway stop exists is an enormous failure of leadership, planning and ambition. Protected bike lanes would ensure these routes are safe and highly used.

Comments for Public Posting: I support this item for protected bike lanes in CD 13. Council District 13 has currently 0 miles of protected bike lanes, despite having 15 miles planned in the mobility plan. This puts us way behind other urban neighborhoods in major cities across the country (and especially the world). Because of this, 814 cyclists have been injured and killed in CD13 since the mobility plan was adopted in 2015. I support installing protected bike lanes on Riverside Dr east of Fletcher to Elysian Park along Stadium Way, implementing the mobility plan, in addition to the rest of the 15 miles in the mobility plan.
