**Comments for Public Posting:** I wholeheartedly support Motion 22-1072 and the Sunset4All plan and encourage you to vote for it. I live in Hancock Park. I love urban walking and biking and am very aware of how few streets in Los Angeles are actually friendly and safe for pedestrians and bicyclists due to the heavy vehicle traffic and high vehicle speeds. I am also very concerned that Los Angeles is NOT meeting its goals to reducing its Greenhouse Gas emissions or becoming a 'greener' city by making public transportation more convenient and useful. Sunset4All will improve our community for all users of the corridor as it will create 3.2 miles of pedestrian improvements, protected bike lanes, more shade, beautification, pocket parks, safer access to schools, and transit upgrades on Sunset Blvd between Fountain and Douglas and Santa Monica Boulevard between Vermont and Sunset Junction thereby safely, efficiently connecting almost 100,000 local residents to the subway. It will encourage people to walk and bike ride along this important corridor which was identified as a priority active transportation corridor in the city's Mobility 2035 Plan. It will improve access to Metro Rail and Bus networks by allowing people to walk or bike ride safely from their homes to the bus / train stations. According to census data over 50% of trips along the Sunset4All corridor are less than three miles. In the city of LA 84% of trips less than three miles are made by car. Sunset4All would enable residents to leave their car at home for shorter trips while safely, efficiently connecting almost 100,000 local residents to the subway (2018 US Census population). Sunset4All would provide an efficient, safe, low cost transportation option to the front door of LA City College. Los Angeles is far behind its goals for becoming a 'greener' city and far behind other American cities. This motion was developed by the community and their stakeholders and unanimously endorsed by three local neighborhood councils without a single vote against it. Please pass this motion and let's start making LA the 'green' city it should be. Let's put in action a well-thought through neighborhood initiated and endorsed plan and start solving our climate crisis. Thank you!
