Comments for Public Posting: Now Paul, we all know you weren't the best at math but this has the same energy and attention you brought to your studies. Work that scrambles at the end to make up for years of procrastination is often sloppy. This motion is sloppy. Why are you utilizing a reserve fund to try to cover years of your neglect? That's not the intent of the reserve fund. The only emergency is the story in the times. The only failure is your grade as a leader Now let's see if you can handle a simple math question. If you add \$1.5 million missing from the animal welfare trust fund and 1 month until the election how many points does it equal you will lose by in November?
