Comments for Public Posting: Hello. I am writing to urge the council to study the Livable Communities Initiative. The Livable Communities Initiative (LCI) is a comprehensive plan that gently combines a gentle increase in density (multi-family buildings of 3-5 stories) along commercial corridors with the aim of creating a more sustainable streetscape. Things like protected bike lanes, small parks, and a tree canopy, would improve both the aesthetic and functionality of the city. This plan will allow people to live near their places of work, which could make LA more affordable, in addition to more diverse, and more sustainable. You have the power to create a city that is more livable and functional for all Los Angeles citizens. Please use your power and say yes to the LCI.
