Council File No: 21-0921

Comments for Public Posting: Well, it is no wonder the Motion to rescind this baseless requirement has not been considered by the COVID-19 Committee. We all now know that the City Council President and chair of the Council Committee, who helped push Ordinance 187134 through the City Council, is a racist. Black Americans are statistically more vaccine hesitant than other races in our country, city, and workforce. It is time to rescind this RACIST requirement that has disproportionately affected people of color in our workforce.
