Comments for Public Posting: We are running out of time and being played by big corporations that do not care about any of us or our planet. Los Angeles is the city of angels, we need to stand by our name and become an example for others all over the world. LA City Council show who we are and represent us in this fight to save our planet, respect animals that are conscient and deserve to live just like all of us, take political power away from lobbyists in dairy, meat and fish industries that are literally destroying Nature and the planet and us! Los Angeles is strong, let's make a difference, let's show what we angelinos are made of and how powerful our collective conscience is when we stand united. Please join and champion the Plant-Based Treaty, don't disappoint us, this is what we want and this is what we must do save our planet. And this is only the beginning, there is a lot of work ahead but this will be the most important and joyful project our city had ever accomplished, being vegan is not only a revolution against the big corps controlling everything from politics all the way to the poisoned, cancerous food they sell us to eat daily. Going vegan is the only comprehensive answer to anything from pandemics to cancer. We need to wake up as a society and realized we are being played and it is time to say "not more". It's time to fight back, because we have the power if we do it together, we control demand and we control trends, we are not going to be blind followers anymore. We change the way we eat, we save ourselves and the planet. Is anything more important than that? There are amazing new companies working hard to give us vegan options such as Beyond Meat, Impossible Food, Just Egg, just to name a few, there are restaurants everywhere in LA serving amazing vegan meals. The solution is HERE. Please watch documentaries, inform yourself independently. Let's stop blindly following what the real enemy, corporations and lobbyists, human rights abusers and warmongers - YES they are all connected - and fight back to save our planet. Of there is a city in the world that can do it is LA. Let's be the champions we know we can be. LET'S GO VEGAN LOS ANGELES.
