Comments for Public Posting: Progressives in LA city council and in state of california have consistently pushed their agenda to vilify small landlords and created the divide between landlords and tenants. Not just nury , but raman, bonin all of them need a lesson in basic social sciences to even be qualified to hold an office. The political gimmicks , creating false narrative about small landlords and businesses will not help la city and not california. Housing providers have been the victims of enough animosity during the past nearly three years under intolerable, COVID protections forcing them to provide housing services without any form of compensation. We housing providers have been criticized and attacked by both renters and government officials throughout the pandemic. This is nothing short of takings from LAcity .Any changes to amendments will have legal repercussions. @raman, Dawson, bonin and the rest - you are the DICTATORS of a city of 4 million. This will be punished. You will be punished !
