Comments for Public Posting: Los Angeles City Council violates Affordable Housing Providers--aka Mom&Pop with illegal Takings, a violation of the constitution. Forced to house for free, unable to claim their own properties either for their own use or for their small businesses, Mom&Pop are curious about the 'legality' of this and the continuing, unending protections of tenants. Does City Council not realize that for tenants, there needs to be LANDLORDS? Who have been given NO protections much less acknowledgment that we even exist. Bonin says we are 'miniscule' St De Leon needs to 'study' the figures, yet here we are throughout the city, on every block, miniscule? Miniscule describes our savings, used up lines of credit, checking accounts, but I doubt our numbers. TAKINGS, yet another Los Angeles City Scandal?
