Comments for Public Posting: Enough already! This was supposed to be covid related and temporary. Put this money into improving our parks! Work with LAUSD to open up school playgrounds on weekends ! Fix our sidewalks! Kids should not be encouraged to play in the street. No matter how slow the traffic is supposed to be cars and children using the street to play in are a bad mix and this concept puts the city at risk.

Comments for Public Posting: I do not support this unless the city is going to use this program to address cut through traffic caused by road diets. If the city values pedestrians please fix the sidewalks first and make them safe for all ages. Stop starting new programs and maintain the infrastructure we already have. Parents teach kids to stay out of the street to avoid being hit by a car or bike. We have hundreds of neighborhood schools with vacant playgrounds after hours and on weekends. Let children play there where there are no cars or scooters or cyclists to watch out for. Safety will be enhance on any street by reducing the speed limit and enforcing it.
