Council File No: 20-0291

Comments for Public Posting: Instigated and led by Mayor Garcetti, with the compliance and oversight by the Los Angeles City Council, the violation of the Takings Amendment has been determined as an illegal use of private properties throughout Los Angeles by denying property owners their rights to occupy their homes and/or receive rent from tenants. While initially forced to do so by the Pandemic, LA leaders quickly saw the emergency order as an opportunity to remove housing rights from owners, therefore bringing the city to a halt while they determined not only redistricting favoritism but yet more opportunity to keep as many people housed as possible by not using city funds for solutions to abate homeless population and supply affordable housing Now with the forced of extension of the moratorium to 1/2023 they continue the violation of using Los Angeles property owners as a stopgap rather than using city resources. This is illegal and the blame falls directly on Garcetti and the city council, prior to however many resignations have happened, including terming out, that follow. All are in contempt of Constitutional violation, and all need to be held responsible. The Moratorium needs to be lifted immediately and permanently removed by law from any future State of Emergency attempting to violate Takings Amendment.
