

MOTION

The Bureau of Street Lighting (BSL) currently maintains and operates multiple street lighting districts within the City of Los Angeles consisting of approximately 223,000 streetlights. The maintenance and operation costs are funded by property-related assessments which are levied on properties adjacent to streetlights. After significant consideration, it is the opinion of BSL that combining all existing districts into a single Citywide Street Lighting Maintenance Assessment District would allow for greater efficiency in the administration of street lighting operations rather than working with a multitude of districts.

BSL has requested that this Council initiate proceedings to form a Citywide Street Lighting Maintenance Assessment District that would include all existing districts. The assessments levied through a Citywide district would continue to fund the maintenance and operation of streetlights located adjacent to assessed property.

I THEREFORE MOVE that the City Attorney, with the assistance of the Bureau of Street Lighting, be requested to prepare and present an ordinance to initiate the formation of a single Citywide Street Lighting Maintenance Assessment District.
