Comments for Public Posting: Instigated and led by Mayor Garcetti, with compliance and oversight by the Los Angeles City Council, the violation of the Takings Amendment has been determined an illegal use of private properties throughout Los Angeles by denying property owners their rights to occupy their homes and/or receive rent from tenants. While initially forced to do so by the Pandemic, LA leaders quickly saw the emergency order as an opportunity to remove housing rights from owners, thereby bringing the city to a halt. By then, they saw an answer to what was long a goal: favoritism redistricting, as well as keeping as many people housed as possible without using city funds for solutions to abate homelessness or supply affordable housing. Now, with the forced extension of the moratorium to 1/31/2023, they continue using Los Angeles property owners as a stopgap rather than using city resources. This is illegal and the blame falls directly on Garcetti and the city council, prior to however many resignations have happened, including terming out, or that will follow, all are in contempt of a Constitutional violation, and all need to be held accountable. The Moratorium needs to be lifted immediately and permanently removed by law from any future State of Emergency attempts that violate the Takings Amendment.

Comments for Public Posting: Today I voted for Rick Caruso because I am fed up with our current City government and their inability to get anything done. Rick is a doer and a been there done that kind of person and I'm the guy to do it again. This city needs a save and I am more than ever convinced after the last 2 weeks, that Rick is the one who can change things up. I am thrilled he is running for Mayor and we have a choice. We need to be through with the garcettis. Throughout the years of this administration, great plans and solutions announced but nothing accomplished. Garcetti and the City Council, with less than a handful of righteous councilmembers, have consistently fallen short. The "progressives" are and will continue to be a disappointment having even less experience, than those who came before, running the best of what Los Angeles was, and the worst of what it looks like today. This is now a cringe-worthy city, an ironic laughingstock with yet more to come in this 'discovery' stage of taped malevolence. And what's up with the Los Angeles Federation of Labor?
