Council File No: 20-0291

Comments for Public Posting: The sham covid emergency is over and this council must vote to end the unnecessary and overreaching state of emergency. The lies have been exposed and the corruption of this body is just being exposed. Stop the attack on thousands of hard working city employees and drop the senseless vaccine mandate for an untested treatment that the cdc has acknowledged does not prevent virus transmission and which is going to result in millions of dollars in damages for its health complications.

Comments for Public Posting: To extend this emergency (again), "conditions of disaster or of extreme peril to the safety of persons and property" (original declaration) need to be persisting due to Covid. Evidence...?

Comments for Public Posting: I vote to end the City's State of Emergency on Covid. At this point there is no state of emergency, CDC guidelines have been drastically minimized and Covid is nothing more than a flu now.
