Comments for Public Posting: I live fifty feet from the front gate of this facility. We have dealt with mismanagement of security guards who are very permissive with drug use, violence and camping immediately outside the facility. Nothing has been done about unhoused persons who maintain both a residence inside the facility and an encampment within a few blocks. My walk street is used daily by bridge housing residents to meet their drug dealers and to partake of those drugs. Needles, tin foil, lighters and drug debris are what we walk through daily. The LAFD paramedic calls are daily. The annual cost of that alone makes this site project prohibitive. The concept was good but the execution of this facility has been dismal. Please don't renew and propagate a bad situation.
