Comments for Public Posting: I have been a resident in CD 13 for the past 24 years. I grew up in this city and have lived in many neighborhoods from Brentwood to Silverlake, and parts in between. I know this city, love this city, and the LCI has shown me how much better it could be, (pause) NEEDS to be. I also love New York, and one reason is that I can walk it, get errands done, have something to eat all the while amidst residential above and adjacent. When I walk at home, it is one or the other. Mixed use, walkable streets hardly exist here. We must find solutions to our housing shortage, to our affordable housing shortage! The LCI is a solution to the crisis situation we have found ourselves in and will help us reach the State Mandate. In addition to simply and smartly relieving our housing shortage, it reduces traffic, and by association carbon emissions. Selfishly for me, it gives me hope that my twin sons will be able to afford to live in Los Angeles when they graduate from college. It gives me hope that smart development will be part of the solution to our climate crisis as well. THANK YOU.
