Comments for Public Posting: There are many benefits to cycling over driving, one of them is its better for our health and the environment. Cycling also reduces the need for cars, something that has been detrimental to the environment and housing. I urge this council to adopt protected bike lanes. You might think “no one bikes here”, which is because the infrastructure is not there. If you build it, they will come. LA needs to be a walkable city, and doing this protected bike lane is the step in the right direction. Please help us all. For more information, I direct you to these YouTube videos:

Comments for Public Posting: I strongly support a protected bicycle lane on Sunset Blvd. I ride my bicycle every day on the existing bike lanes to get to and from work. Every trip I feel as though my life is threatened as cars going 40+ mph zoom within inches of me. There is plenty of space on that road for a protected bike lane. Road design has prioritized cars for too long. Excess car infrastructure is impractical, unsustainable and makes our city unlivable. Installing a protected bicycle lane on Sunset Blvd would be a step in the right direction.

Comments for Public Posting: Dear Sirs, I am asking that you proceed with the protected bike lanes along Sunset Boulevard. Although I am currently retired I recall the many times I have been almost hit by cars while riding my car from Silverlake to downtown on my way to work. If we are to truly make this city bike friendly it is imperative to make commuters bike lines safe. I've been hit while riding my bike by a distracted driver and it's only luck that I am here to make a plea for safe bike lanes today. Thank you, David Woodard
