Council File No: 22-1154

Comments for Public Posting: I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles. The Neighborhood Councils should have had a chance to thoroughly consider this plan. The plan has not had any environmental reviews. The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission. And the kiosks will distract drivers. For this and other reasons I ask that you engage in a full and transparent outreach and public review process. Thank you,
