Council File No: 22-1186

Comments for Public Posting: Again, thank you to council members krekorian and O Farrell. We hope that the rest of the state follows LA's leadership in tackling both our water and energy crisis. Important to Support distributed energy and other non-combustion, clean energy sources, especially in a federal ozone non-attainment area. Thank you to the council for your leadership and for putting forth great climate policies and I urge the council to advance these policies (items # 6,7 and 8 on the ECCEJR committee meeting today) for a climate-resilient Los Angeles.
