Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles

To whom it may concern:

Come on, nobody that isn't make no money from it, including taking contributions from it, wants LA to be more like "Blade Runner". Get rid of this IKE thing. If you care what frequent visitors like me think, then pick up the out of hand litter situation. Nobody alive ever said "This place would be real cool, if only they had more outdoor advertising".

Sincerely,
 Erik Hanson

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles

To whom it may concern:

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.
- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred " method of implementing the IKE program when it should be fully vetted instead.
- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).
- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process.
- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach and public review process.

Thank you for your consideration,

Sincerely,
 Nicole Antoine

Thank you for your consideration- city council has shown itself to engage repeatedly in back room dealings making it feel very corrupt indeed. That needs to stop now. As a democrat I am embarrassed by actions of this city council.

Sincerely,
Janine Milne

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles

To whom it may concern:

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.

- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred" method of implementing the IKE program when it should be fully vetted instead.
- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).
- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process.
- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach and public review process.

Thank you for your consideration,

Sincerely,

In addition to all of the points listed above, look at the photo in the ad shown. The young lady has stopped to interact with the kiosk, the people are walking at a good clip, they are taking up the remaining space left on the sidewalk. Now envision people walking toward them, also detouring around the large sign perhaps on a walker and you can see the problem.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach.

- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).
- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process.
- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach and public review process.

Thank you for your consideration,

Sincerely,
Jeffrey Findeis

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles

To whom it may concern:

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.
- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred" method of implementing the IKE program when it should be fully vetted instead.
- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).
- There has been NO financial analysis of projected revenues for this Program.

- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach and public review process.

Thank you for your consideration,

Sincerely,
Catherine Beauchamp

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles

To whom it may concern:

As a 45-year member of this community, I'm APPALLED at how DECEPTIVELY the IKE Proposal is being handled !!

I STRONGLY OPPOSE the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles !!

I OPPOSE the IKE Program for the following reasons:

- There has been NO opportunity for PUBLIC COMMENT or meaningful public input from Neighborhood Councils or the community at large.
- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred" method of implementing the IKE program when it should be FULLY VETTED instead!!
- The IKE Program has NOT had ANY ENVIRONMENTAL REVIEW, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors)!!
- There has been NO financial analysis of projected revenues for this Program!
- The Houston Program of approximately 125 Ad Kiosks is NOT comparable to LA's proposed program of 300 to 500 of these structures !!!
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter)!
- The IKE Program will permit HUNDREDS of Digital Ad Kiosks NOT IN COMPLIANCE with the City's 2002 Sign Ordinance, jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards!
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process!!
- NO analysis has been conducted as to the dangers associated with DRIVER DISTRACTION based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility !!!
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission!
- Adoption of this Program would allow the commercialization of our shared public spaces!

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you ADOPT Councilmember Bonin's MINORITY REPORT presented to the Council Committee on Trade, Travel and Tourism, and engage in a FULL AND TRANSPARENT outreach and PUBLIC REVIEW process !!!

Thank you for your consideration,

Sincerely,
Hilary Young

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.
- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred " method of implementing the IKE program when it should be fully vetted instead.
- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).

- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process.
- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach and public review process.

Thank you for your consideration,

Sincerely,

- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process.
- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach and public review process.

Thank you for your consideration,

Sincerely,
diane olson

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles
To whom it may concern:

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.
- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred" method of implementing the IKE program when it should be fully vetted instead.
- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).
- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.

- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.

- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process.
- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach and public review process.

Thank you for your consideration,

Sincerely,
 Greg Goldin

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles

To whom it may concern:

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.
- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred " method of implementing the IKE program when it should be fully vetted instead.
- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and

major corridors).

- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles
To whom it may concern:

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.
- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred" method of implementing the IKE program when it should be fully vetted instead.
- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).
- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process.
- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach and public review process.

Thank you for your consideration,

Sincerely,
Donald Seligman

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles
To whom it may concern:

Please protect the citizens of Los Angeles from advertising kiosks which will endanger pedestrians and further erode the walkability of our city. These decisions will follow Angeleno politicians in their future campaigns. The narrative has shifted in Los Angeles. Leaders are held accountable for their poor leadership and back room deals.

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.

- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).
- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
- The IKE Program will permit hundreds of Digital Ad Kiosks not in compliance with the City's 2002 Sign Ordinance jeopardizing the ability of the City to defend its ban on billboards. This in an environment of very litigious outdoor advertising companies that have already demonstrated their desire to challenge the City's legal authority to regulate billboards.
- By failing to engage in an open competitive bidding process, and by choosing an Ohio-based digital media company, the City has denied local vendors a fair opportunity to participate in this process.
- No analysis has been conducted as to the dangers associated with driver distraction based on roadside digital-changing messaging or how the mass and size create barriers to unobstructed visibility.
- The IKE Program may violate privacy rights by collecting information on each user's interaction with the Kiosks and may share the information without permission.
- Adoption of this Program would allow the commercialization of our shared public spaces.

For all of the reasons stated above and pursuant to Council Rule 69, I join Scenic America and Scenic Los Angeles in asking that you adopt Councilmember Bonin's Minority Report presented to the Council Committee on Trade, Travel and Tourism, and engage in a full and transparent outreach

and public review process.

Thank you for your consideration,

Sincerely,
Julie Slater-Giglioli

Subject: CF-22-1154- Installation and Maintenance Contract of Interactive Kiosks in The City of Los Angeles

To whom it may concern:

I oppose the back-room dealing and fast-tracking of the IKE SMART CITY contract to install and maintain 300-500 Interactive Digital Ad Kiosks on our public streets throughout the City of Los Angeles.

I oppose the IKE Program for the following reasons:

- There has been NO opportunity for public comment or meaningful public input from Neighborhood Councils or the community at large.
- The Mayor and City Council propose a "piggyback" contract (which may not meet requirements of the LA Municipal Code) "as the most efficient and preferred " method of implementing the IKE program when it should be fully vetted instead.
- The IKE Program has not had ANY environmental review, including an analysis of cumulative impacts that takes into account the recently approved Street Transit Amenities Program (street furniture) or Metro's pending Transit Communications Network Program (digital billboards along freeways and major corridors).
- There has been NO financial analysis of projected revenues for this Program.
- The Houston Program of approximately 125 Ad Kiosks is not comparable to LA's proposed program of 300 to 500 of these structures.
- The IKE Program has not been reviewed by the City Council's Transportation Committee or LA's Department of City Planning (that may constitute a violation of the City Charter).
