**Council File No:** 22-1180

**Comments for Public Posting:** Regarding the additional funding (item 22-1180), the City Council must know they have NOT kept their promise they made to voters when they passed Prop F in 2000, which provided funding to expand existing shelters and increase the number of City Shelters from 6 to 8. The department still only operates in 6. The number of dog kennels was meant to be expanded to 1200 for them to be safe and humane. LAAS does not have access to all of these kennels and the animals are living in overcrowded and inhumane conditions. It is imperative that you add additional shelters to improve response times. You have not kept your promises and animals are dying every day because of it. Please, do your jobs!! These animals are suffering and dying. It is a complete disgrace to live in the city of Los Angeles with so many animals suffering and dying. I have never seen anything like it. You must open the two new shelters to save these poor innocent lives.
