**Comments for Public Posting:** This is a community I grew up and have lived in over 30 years. I am proud of my community and the people who are actively making the walkways and pathways safe to walk. I have seen a lot of changes and improvements because of people who have continued to serve, specifically in the Pacoima Spreading Grounds and the Nature Parkway. I hope that this support continues and that we have more leadership who cares about the community where they get voted in as our representative.
