**Council File No:** 22-1127

**Comments for Public Posting:** Please stop expanding the van nuys airport without the community input and an environmental study on the effects of what the increase planes do to the surrounding communities. You have so many schools directly under the flight paths and near the airport. The noise pollution is getting worse and not to mention the overall deteriorating air pollution to the SFV air quality. The SFV gets no sea breeze and the air just sits there. It's very unfair to close the Santa Monica airport at the expense of other community members in less affluent communities. The closure will only add more traffic to the airport. Santa Monica will get a park and my children will get toxic fumes. The expansion was never ever brought up to us. Most know there was an airport nearby but what we didn't know was that the increased amount of activity and expansion the airport would have. The surrounding community don't see a dime from all this. No one is benefiting from this except all the elites and celebrities who could care less about the negative environmental impact they have. Burbank is also close by do we need to have 2 airports? Do we need to have more toxic fumes. There are so many home owners across the airport that have to deal with the jets engines and fumes being sent directly into the homes. How can you let your children play outside. How is this even okay?!?! How?!? Is the council, law and who ever else so numb and so far removed to think this whole situation is okay. Van nuys is near so many homes, and schools. At least with other airports they are in commercial or industrialized areas. Is there any research relating to the added flights or the impact in the communities or the impact on the environment or the impact on wildlife? please stop expanding and allowing these celebrities who don't contribute anything positive to our communities to stop chartering planes from van nuys. They can fly to lax or Burbank. Please let the community be involved and let our voices be heard.
