Council File No: 18-0510-S2

Comments for Public Posting: Please continue this item so that the new council person may participate in the discussion of this lease extension and the pending litigation facing this item due to the City's failure to obtain a Coastal Development Permit (CDP) under the California Coastal Act. Even a temporary development such as this Bridge Housing facility requires a CDP, as required by the CCC in its initial temporary waiver granted to this facility. The matter should be continued until a CDP is obtained and to allow the new council person to participate in the discussion of the proposed lease extension, which would occur entirely under the new council person's term in office.
