Council File No: 22-1177

Comments for Public Posting: Esteemed Councilmembers, The Northeast San Fernando Valley is saturated with essential workers that are also classified as the "working poor". Although these adults juggle two or three jobs, they can still barely sustain their families. These families never consented to being pushed out of balance and subjected to poverty, disproportionality, inequity, oppression, institutional racism, and violence. Nevertheless, they experience the highest rates of COVID 19 related hospitalizations and fatalities in the nation. I urge you to support motion 22-1177 to improve the area surrounding the Pacoima Spreading Grounds that includes Arleta Avenue, Filmore Street, Woodman Avenue, and Devonshire Avenue and allow the Community access to a Healing Space that facilitates family activities and contact with Nature to promote recovery, self-regulation, and Wellness.
