**Comments for Public Posting:** As a long time Calabasas residents, my wife and I am extremely concerned about the increased air traffic over our skies. I am outdoors quite a bit, doing yardwork, walking the dog, etc., and quite often (with increasing frequency) multiple aircrafts (major airlines, personal commuter planes, helicopters, etc) have been heard and seen passing overhead. We use to live in North Hollywood, just under the flight path of planes for Burbank Airport but we knew what we were purchasing when we bought our home. We subsequent moved to Calabasas knowing that we would have quieter skies and a more rural like atmosphere. However, the increase air traffic has caused great concern for the environment, safety of our community, privacy, and property values. People taking "shortcuts" through our community increases the likelihood of potential problems ... look at 3 years ago with what happened with Kobe Bryant, et al. Please rectify the situation and give us back our community!!!
