**Council File No:** 22-1489

**Comments for Public Posting:** THOUSANDS of us support Motion 22-1489. This is the first motion that actually puts the Valley community and public's interest as the priority of what happens at Van Nuys Airport. For too long LAWA, BOAC, FAA and all the government agencies that are supposed to be protecting the public's health and welfare have been turning a blind eye to the over expansion at VNY, and ignoring their due diligence by ignoring the public's best interest. The fact that several City Council members support this motion is a clear indication that this is what the PUBLIC wants and needs - not just the money interests, private jet owners and charter companies who seem to be in control of VNY. This motion is an important addition to Motion 22-1125 that was recently passed, requesting the City Attorney look into - and hopefully restrict - the Charter Companies that have essentially turned VNY into a COMMERCIAL AIRPORT with NO security, restrictions, curfews or consideration for the environmental and health damage they are causing. NO more expansion, NO more leases granted without full disclosures and appropriate time to review, NO more backroom dealings that have for too long been the status quo. TRANSPARENCY and COMMUNITY INPUT needs to be implemented ASAP. This motion is a step in that direction.
