**LETTER TO FILE:**

ENV-2019-2568-SCEA

Public Comment Letters

The City of Los Angeles (City) prepared a Sustainable Communities Environmental Assessment (SCEA) dated November 2022 and a Mitigation Monitoring and Reporting Program (MMRP) for The Parks in LA Project. The SCEA was released for public comment from November 16, 2022, to December 16, 2022. A Hearing Officer public hearing was held for the proposed Project on December 14, 2022.

**PUBLIC COMMENTS**

During the review period the Lead Agency received comment letters from the following entities:

- Wilshire Center-Koreatown Neighborhood Council (WCKNC)
- Alek Friedman (Central Hollywood Neighborhood Council)
- Emi Ohari & Satoe Ohari (Abutting property owners)
- Ki Nam Ko & Young Sook Woo (Abutting occupant)
- Lozeau Drury, LLP (representing Supporters Alliance for Environmental Responsibility ("SAFER"))
- Nam Kim (Former President of Wilshire Koreatown Neighborhood Council)
- Pyung C (Koreatown citizen)
- mkprop@frontier.com
- Mitchell M. Tsai (representing the Southwest Regional Council of Carpenters "Southwest Carpenters" or "SWRCC")

Attached are the comment letters received for the SCEA. The issues raised in the comment letters do not provide substantial evidence that a significant environmental impact is likely to occur. As such, the SCEA as circulated satisfies the legal requirements of CEQA, and no further analysis is warranted.

Inquiries regarding the SCEA shall be directed to Chi Dang, Planning Staff for the Department of City Planning at (213) 978-1177 or Chi.Dang@lacity.org.

**WILSHIRE CENTER  
KOREATOWN**  
NEIGHBORHOOD COUNCIL

DATE: December 13, 2022

TO: Zoning Administration Division  
Vincent Bertoni, Los Angeles Director of Planning  
Chi Dang, City Planner  
Karly Katona, Caretaker, CD-10

FROM: Wilshire Center-Koreatown Neighborhood Council

SUBJECT: CPC-2019-2567-GPAJ-VZCJ-HD-CUB-SPR and ENV-2019-2568-EAF

The Wilshire Center-Koreatown Neighborhood Council (WCKNC), at its duly noticed General Board Meeting on December 12, 2022, considered on its agenda, item IV.H.: the construction of a new eight-story, 88.5-ft high, 293,820 square foot mixed-use development comprised of 251 units with 11% set aside for very low-income households at 3433 W. 8th St. 90005 (Case No's. CPC-2019-2567-GPAJ-VZCJ-HD-CUB-SPR and ENV-2019-2568-EAF). This CPC Project seeks to make use of the following incentives: a Height District Change to increase density and land use and reduce open space requirements, a Site Plan Review, and a Conditional Use Permit for a full-line of alcoholic beverages for on and off-site consumption in conjunction with two restaurants and an open food court or market use.

After board consideration and providing opportunity for public comment, the WCKNC General Board voted unanimously in favor (11-0-0) of the motion to **support** the requested discretionary approvals and entitlements with the following notes and recommendations as referred by the WCKNC PLUM Committee:

- The NC appreciates the applicant's commitment to accessibility, community engagement, and sustainability, such as their commitment to retaining all street trees on W. 8th St. and S. Hobart Blvd; as well as the consideration of traffic patterns and loading areas.
- Additionally, the NC appreciates the architectural style that provides an open green space for residents, patrons, and other community members.
- **As requested by the NC and agreed upon by the applicant at the 12/12/2022 public hearing via the WCKNC General Board meeting, the project will include 2 to 4 low income units in lieu of the equivalent number of extremely low income units, as determined by HCID.**

Please notify the Wilshire Center-Koreatown Neighborhood Council of any future meetings and/or hearings on this item.

To: chi.dang@lacity.org

Fri, Nov 18, 2022 at 9:15 PM

Dear Mr. Dang,

I would like to comment on the proposed development, reference numbers:

CASE: #ENV-2019-2568-SCEAADDRESS: [3431-3455 W. 8th Street](#) - in Koreatown, Los Angeles CA 90005. "The Parks". Also, 749, [765](#) & 767 S. Harvard Boulevard, Los Angeles, CA 90005.

Specifically, I believe the proposed building design / color scheme needs major changes. Currently, the facade colors are too dark, gloomy, uninviting, and overly utilitarian. Also, the dark (gray) color may cause issues during hot days, since the dark exterior colors cause the building to absorb heat, hence the developer may be interested in revising the color. Lastly, the dark (especially gray!) color is not pedestrian-friendly, from the Urban Development perspective; it ruins the streetscape aesthetics and deters walkability.

**Please forward the request** to developer and/or architect, to consider lighter, brighter, more vibrant colors of the building. Perhaps, the white color / off-white / beige (with some patterns of other colors) would greatly improve the image of the building.

Thank you so much. I will look forward to the amended color scheme of the building!

Best regards,

--

Re: ENV-2019-2568-SCEA  
The Parks in LA

Dear Ms. Dang and Los Angeles Department of City Planning,

We are in receipt of the draft of the Sustainable Communities Environmental Assessment (SCEA) for "The Parks in LA". We own the property at 740 S. Hobart Blvd., Los Angeles, CA 90005, which is located next to this project.

The proposed 88'-6" high building is L shaped and surrounds our apartment building all along our south side (8th St.) as well as approximately 1/3 of our east side (Harvard Blvd ).

ENV-2019-2568-SCEA states that the project developer is requesting discretionary approval for a 16-foot rear yard setback in lieu of the required 20-foot rear yard setback. We understand this to be a request to bring their large building closer to our property on our south and east sides.

We are concerned. As it is, the proposed eight story building will block out our natural light, especially all natural light from the south. A reduced 16-foot rear yard setback would have negative impacts on our apartment building and our business as follows.

- 1) Our building will be robbed of even more natural light, forcing our tenants to live in dark rooms.
- 2) There will be less sound isolation for our tenants, less environmental protection.
- 3) A mammoth 8 story building that is closer poses risk in the event of earthquakes/ natural disasters.

We wish to contest and request the Los Angeles Department of City Planning (and other pertinent Departments, if any) to deny discretionary approval that would allow a 16-foot rear yard setback in lieu of the required 20 foot rear yard setback for "The Parks in LA".

Thank you for your assistance.

Yours very truly,

A handwritten signature in cursive script, appearing to read "Emi Ohari".

Re: ENV-2019-2568-SCEA

Dear Chi Dang,

We are residents of the apartment building at 740 S. Hobart Blvd and have received and reviewed the copy of the above SCEA.

The new 8 story project of the "The Parks in LA" will unfortunately obstruct much of the natural light we have today as our apartment building is located right next to the proposed project.

According to the SCEA, the developer of "The Parks in LA" is seeking discretionary approval to allow for a 16' Rear yard. Rear Yard reduction would make our apartment building even darker. We ask the Los Angeles Department of City Planning to help us residents preserve even a small amount of natural light by requiring a standard 20' Rear yard.

Thank you for the opportunity to make this comment.

UJG

Sincerely,

**Re: Comment on Sustainable Communities Environmental Assessment, The  
Parks in L.A. Project (ENV-2019-2568-SCEA)**

Dear Ms. Dang:

I am writing on behalf of Supporters Alliance for Environmental Responsibility ("SAFER") regarding the Sustainable Communities Environmental Assessment ("SCEA") prepared for The Parks in L.A. Project (ENV-2019-2568-SCEA) including all actions related or referring to the proposed construction of a mixed-use development consisting of 251 apartment units and 40,500 square feet of commercial uses, located at 3431-3455 West 8th Street and 749, 765 & 767 South Harvard Boulevard, in the City of Los Angeles ("Project"), which is being heard on December 14, 2022 by the Hearing Officer.

After reviewing the SCEA, we conclude the SCEA fails as an informational document and fails to impose all feasible mitigation measures to reduce the Project's impacts. Therefore, we request that the Development Services Department prepare a revised SCEA or, in the alternative, prepare an Environmental Impact Report ("EIR") for the Project pursuant to the California Environmental Quality Act ("CEQA"), Public Resources Code section 21000, et seq.

December 12, 2022

Comment on Sustainable Communities Environmental Assessment, The Parks in LA

Page 2 of 2

We reserve the right to supplement these comments, including but not limited to at public hearings concerning the Project. *Galante Vineyards v. Monterey Peninsula Water Management Dist.*, 60 Cal. App. 4th 1109, 1121 (1997).

A SCEA must incorporate all mitigation measures from the Sustainable Communities Strategy. (Pub. Res. Code section 21155(a) and (b).) However, the SCEA declines to implement numerous mitigation measures set forth in the SCEA. Therefore, the City may not rely on the SCEA and must prepare an EIR. Among the many SCS mitigation measures that the SCEA fails to implement are:

- PMM AES 1 – requiring graffiti resistant materials. (SCEA p. 28)
- PMM AES-2: Measures to reduce aesthetic impacts. (SCEA p. 28).
- PMM AES-3: Shielding for lighting fixtures. (SCEA p. 30).
- PMM AQ-1: Tier 4 construction equipment and other measures. (SCEA p. 34).
- PMM GHG-1: MM to reduce GHGs. (SCEA p. 52)
- PMM HYD-1: SWPPP for construction. (SCEA p. 61).
- PMM NOISE-1. Install noise barriers for construction. (SCEA p. 65).
- PMM PSP-1. Ensure adequate public services. (SCEA p. 69).
- PMM TRA-1: Transportation Demand Management strategies, such as bike lanes, universal transit passes, parking cash-out, vanpools, carpooling, etc. (SCEA p. 71).

The SCEA contends that all of the above measures are “not necessary.” But the measures are absolutely necessary if the City intends to dispense with the requirement to prepare an environmental impact report (“EIR”) and instead prepare the short-form SCEA. The whole point of the SCEA is that streamlined environmental review is allowed because the Project will implement all mitigation measures set forth in the SCS. The above measures would clearly reduce the Project’s impacts and they are required to be implemented pursuant to CEQA Section 21155. Since the City has refused to implement these measures, the City may not rely on the SCEA and must prepare an EIR.

Sincerely,

Richard Drury  
Lozeau Drury LLP

Environmental

Case No: ENV-2019-2568-SCEA

Project name: The Parks in LA

Project Applicant: Charles Park &amp; Associates, LLC.

Project Address: 3431-3455 West 8th Street,

749-767 South Harvard Boulevard,

744-762 South Hobart Boulevard, Los Angeles, CA 90005

Dear Chi Dang City Planner,

My name is Nam Kim, the former President of Wilshire Koreatown Neighbor. As one of the residents who has lived in the Los Angeles Koreatown over 40 years, I oppose the "The Park in LA" project for several reasons.

1. D.O.T traffic control investigation is needed
2. Changing PB ZONE to C-2 ZONE is a great benefit given to applicant
3. Oppose the application for three liquor licenses since there are too many restaurants or businesses already that handle alcohol in each block.
4. The city planning of District 10 area, particularly Koreatown, is a policy that ignores various problems such as traffic, security, racial conflicts due to the influx of multiracial people, and the lack of police, fire, and safety personnel that will occur in the next 10 to 20 years.

5. Currently, there are 33 new construction projects in Koreatown approved by City of Los Angeles, and the number of construction units are 5354 units.
6. As a result of approving project, the residents will experience the problems such as insufficient educational facilities, insufficient shelter space, and parks, and this is an act of depriving residents of their rights to improve the quality of life and live happily.
7. Many new construction projects can cause overcrowding, increasing crime, and creating defenselessness in safety.
8. Project Applicant wants to build as many units as possible without considering the community and neighbors by requesting increase the height of the building to 88ft even though the height of the building is limited to 75ft, reducing the area of backyard from 20-foot to 16-foot, and open space from 25,725sq to 20,580sq is the idea of selfishness of applicant

Thank you for your time to review this case.  
Sincerely.

Nam Kim

Case No: ENV-2019-2568-SCEA

Project name: The Parks in LA

Project Applicant: Charles Park & Associates, LLC.

Project Address: 3431-3455 West 8th Street, 749-767 South Harvard Boulevard, 744-762 South Hobart Boulevard, Los Angeles, CA 90005

Dear Chi Dang City Planner,

I am a citizen who is living in Koreatown.

I received the Notice of availability letter from the Los Angeles Planning department.

The Parks in LA : 3431-3455 W 8th street, 749-767 South Harvard, which will start a new project, I would like to ask you some questions below and some things that may lead to bad results.

**1. To allow a 16 ft rear yard setback in lieu of the 20 ft rear yard setback otherwise required:**

This road is narrow and people walk a lot day and night. Reduce setbacks at this distance from 20 ft Back yard to 16 ft Back yard, which could be fatal to the building and street in the event of a fire in the building, and also violates California Section 1276.01. Please review this part and politely answer why it should be allowed in this building.

**2. Pursuant to City Charter Section 558 and LAMC Section 12.32 F, a Vesting Zone Change and Height District Change to modify the Zone and Height District for the Subject lots from C2-1 and PB-1 to C22-2:**

The 75ft height limit, zoning, would have been enforced in consideration of the neighbors' right to sunlight, but the project's height restriction modification will inevitably cause damage to the neighbors. If the building is built at 88ft, please review again whether there is any damage to the right of sunlight of the neighbors.

**3. Overcrowded population:**

Currently, the population of Korea town is in the Overcrowded population state. It doesn't make sense to change the zoning in this state to make it more densely populated. This will make the already extreme traffic congestion even more extreme and make the narrow roads even narrower, making it dangerous for citizens passing by. We ask for thorough environmental assessment and traffic survey in this part, and we kindly ask for your answer.

#### **4. Reducing Open space:**

Despite the great benefits the petitioner receives from the permit above, the fact that even the open space is reduced from 25,725 sq ft to 20,580 sq ft shows that the applicant intends to proceed with this project without any consideration of the city and surrounding neighborhoods. I believe that a building should fit in with the city and serve its citizens. This must

#### **5. Construction equipment materials loaded on the street:**

Today, many construction sites throughout the Korea town have construction materials and equipment loaded and parked on the streets, making the originally narrow roads even narrower and causing extreme traffic jams. As the project is reduced to set back, it is clear that it will cause more severe traffic congestion than before. Please review this part.

Thank you very much for reviewing my comments.

Hope you have a nice day.

Thank you.

Sincerely.

Chi Dang &lt;chi.dang@lacity.org&gt;

## The parks in LA

1 message

---

**Pyung c** <justinopk@gmail.com>  
To: chi.dang@lacity.org

Wed, Dec 14, 2022 at 9:45 AM

Dear Mr. Chi, Dang

Environmental case No.: ENV-2019-2568-SCEA  
Project name: The Parks in LA  
Project Applicant: Charles Park & Associates, LLC  
Project address:  
3431 - 3455 West 8th street. 749 - 767 South Harvard Boulevard,  
744 - 762 South Hobart Boulevard, Los Angeles, CA 90005  
Community plan area: Wilshire  
Council district: 10 - Hutt

I am a citizen in Korea town. Although it is a busy part of the city, I have been enjoying living in this city. I understand that there are more needs for more units. I have been seeing many developments happening in this city but after reading through the notice of availability for The Parks in LA, I decided to speak up.

For the setback and pedestrian safety,

In the project description, I read that setback was adjusted to 16' instead of 20'. I am one of the citizens that use the sidewalk every day. I often spot homeless people on the sidewalk and I go around them for my safety. If the setback reduces, it increases the risk of my safety. And by allowing the building height to 88' instead of 75' maximum allowed height, it will create more shadows to surroundings and that will bring us more darkness to the city.

For density and living quality,

Setback reduction and height change must happen for greater density for the project.

Every morning through night, the city is really busy and already there is heavy traffic with very limited space for parkings on 8th st.

Due to already developed apartment complexes near here, streets are filled with vehicles already, and this very heavy density project will bring us the nightmare of traffic to our neighborhood. I want the project to go through serious traffic study.

Health issues caused by Demolition of the existing commercial buildings, and Asbestos.

I breathe and live in the city of LA. From single house demolition, so much trash and dust comes out from it. But by demolishing the entire row of the 8th st block in between Hobart and Harvard Blvd, it will create a lot of trash and dust will fly all over the place. The project will be held in the middle of the main street. Even during the construction, dust and trash will come out. It would be very hard for me to walk around and breathe around the development on the main street. I go to a restaurant near there, but when this development starts, I would feel very uncomfortable eating around there as well. Before the demolition, please request for the Asbestos report.

For public roads,

At this point I know that whenever there is major development, at some point, roads get blocked due to construction activity.

There are already several roads blocked and creating heavy traffic. This kind of size would not finish shortly. When this block happens, I cannot no longer walk around here, there will be less parking for my guests and myself, and I will be facing inconvenient driving every day.

Please revise this project seriously on behalf of us.  
Our citizens are relying on your decision.

Thank you.

Chi Dang &lt;chi.dang@lacity.org&gt;

Hello, I am concerned about The Parks construction due to subterranean parking. There is water constantly draining from 837 S Harvard Blvd onto street and I am concerned new construction will exacerbate the situation. Is the SCEA in lieu of an environmental impact report? I am requesting environmental impact report if possible.

Does the SCEA go into more detail? I followed online links written in notice and report is the same as received in mail. Thank you.

Chi Dang, City Planner  
LOS ANGELES DEPARTMENT OF CITY PLANNING  
200 North Spring Street, Room 621  
Los Angeles, CA 90012  
Em: [chi.dang@lacity.org](mailto:chi.dang@lacity.org)

**RE: Agenda Item No. 1 Sustainable Communities Environmental  
Assessment No. ENV-2019-2568-SCEA, The Parks in LA Project.**

Dear Hearing Officer and Chi Dang,

On behalf of the Southwest Mountain States Regional Council of Carpenters (“**Southwest Mountain States Carpenters**” or “**SWMSRCC**”), my Office is submitting these comments for the City of Los Angeles’ (“**City**”) December 14, 2022, Hearing Officer hearing for the Parks in LA Project (“**Project**”).

The Southwest Mountain States Regional Council of Carpenters is a labor union representing 63,000 union carpenters in 10 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

Individual members of SWMSRCC live, work, and recreate in the City and surrounding communities and would be directly affected by the Project’s environmental impacts.

The Southwest Mountain States Regional Council of Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

The Southwest Mountain States Regional Council of Carpenters incorporates by reference all comments raising issues regarding the Project, including comments to

the Sustainable Communities Environmental Assessment (“**SCEA**”), submitted prior to approval of the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project’s environmental documentation may assert any issue timely raised by other parties).

Moreover, the SWMSRCC requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (“**CEQA**”) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law (“**Planning and Zoning Law**”) (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency’s governing body.

## **I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY’S ECONOMIC DEVELOPMENT AND ENVIRONMENT**

The City should require the Project to be built using a local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related [greenhouse gas] emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.<sup>1</sup>

Furthermore, workforce policies have significant environmental benefits given that they improve an area’s jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (“**GHG**”) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that that the “[u]se of a local state-certified apprenticeship program” can result in air pollutant reductions.<sup>2</sup>

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.<sup>3</sup>

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (“**VT**”). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VT reductions given that the skill requirements of available local jobs must match those held by local residents.<sup>4</sup> Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city’s First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 (“**AB2011**”). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

---

## **II. THE CITY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT’S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES**

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupational Safety and Health Administration. Recently, several construction sites have been identified as sources of community spread of COVID-19.<sup>5</sup>

Southwest Mountain States Regional Council of Carpenters recommend that the Lead Agency adopt additional requirements to mitigate public health risks from the Project’s construction activities. SWMSRCC requests that the Lead Agency require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

In particular, based upon Southwest Mountain States Regional Council of Carpenters’ experience with safe construction site work practices, SWMSRCC recommends that the Lead Agency require that while construction activities are being conducted at the Project Site:

### **Construction Site Design:**

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.
- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.

---

<sup>5</sup> Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, *available at* <https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx>.

- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.
- There will be clear signage posted at the project site directing you through temperature screening.
- Provide hand washing stations throughout the construction site.

**Testing Procedures:**

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.

- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the Project Site. DHS will also instruct the individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

### **Planning**

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.<sup>6</sup>

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The Agency should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

Southwest Mountain States Regional Council of Carpenters has also developed a rigorous Infection Control Risk Assessment (“**ICRA**”) training program to ensure it delivers a workforce that understands how to identify and control infection risks by

implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.<sup>7</sup>

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

The City should require the Project to be built using a workforce trained in ICRA protocols.

### **III. THE PROJECT WOULD BE APPROVED IN VIOLATION OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT**

#### **A. Background Concerning the California Environmental Quality Act.**

The California Environmental Quality Act is a California statute designed to inform decision-makers and the public about the potential significant environmental effects of a project. 14 California Code of Regulations (“**CEQA Guidelines**”), § 15002, subd. (a)(1).<sup>8</sup> At its core, its purpose is to “inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made.” *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564.

##### *1. Background Concerning Environmental Impact Reports*

CEQA directs public agencies to avoid or reduce environmental damage, when possible, by requiring alternatives or mitigation measures. CEQA Guidelines, § 15002, subds. (a)(2)-(3); see also *Berkeley Keep Jets Over the Bay Committee v. Board of Port Comes* (2001) 91 Cal.App.4th 1344, 1354; *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553; *Laurel Heights Improvement Assn.*, 47 Cal.3d at p. 400. The EIR serves to provide public agencies and the public in general with information about the effect that a proposed project is likely to have on the environment and to “identify ways that environmental damage can be avoided or significantly reduced.” CEQA Guidelines, § 15002, subd. (a)(2). If the project has a significant effect on the

---

<sup>7</sup> For details concerning Southwest Carpenters’s ICRA training program, *see* <https://icrahealthcare.com/>.

<sup>8</sup> The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 et seq., are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. Cal. Pub. Res. Code, § 21083. The CEQA Guidelines are given “great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous.” *Center for Biological Diversity v. Dept. of Fish & Wildlife* (2015) 62 Cal.4th 204, 217.

environment, the agency may approve the project only upon finding that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns” specified in Public Resources Code section 21081. See CEQA Guidelines, § 15092, subds. (b)(2)(A)-(B).

While the courts review an EIR using an ‘abuse of discretion’ standard, the reviewing court is not to *uncritically* rely on every study or analysis presented by a project proponent in support of its position. *Berkeley Jets*, 91 Cal.App.4th at p. 1355 (quoting *Laurel Heights Improvement Assn.*, 47 Cal.3d at pp. 391, 409 fn. 12) (internal quotations omitted). A clearly inadequate or unsupported study is entitled to no judicial deference. *Id.* Drawing this line and determining whether the EIR complies with CEQA’s information disclosure requirements presents a question of law subject to independent review by the courts. *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 515; *Madera Oversight Coalition, Inc. v. County of Madera* (2011) 199 Cal.App.4th 48, 102, 131. As the court stated in *Berkeley Jets*, prejudicial abuse of discretion occurs if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process. 91 Cal.App.4th at p. 1355 (internal quotations omitted).

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. *Communities for a Better Environment v. Richmond* (2010) 184 Cal.App.4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449-450). The EIR’s function is to ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. *Id.* For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is made. *Id.*

A strong presumption in favor of requiring preparation of an EIR is built into CEQA. This presumption is reflected in what is known as the “fair argument” standard under which an EIR must be prepared whenever substantial evidence in the record supports a fair argument that a project may have a significant effect on the environment. *Quail*

*Botanical Gardens Found., Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602; *Friends of “B” St. v. City of Hayward* (1980) 106 Cal.3d 988, 1002.

The fair argument test stems from the statutory mandate that an EIR be prepared for any project that “may have a significant effect on the environment.” PRC, § 21151; see *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.App.3d 68, 75; accord *Jensen v. City of Santa Rosa* (2018) 23 Cal.App.5th 877, 884. Under this test, if a proposed project is not exempt and may cause a significant effect on the environment, the lead agency must prepare an EIR. PRC, §§ 21100 (a), 21151; CEQA Guidelines, § 15064 (a)(1), (f)(1). An EIR may be dispensed with only if the lead agency finds no substantial evidence in the initial study or elsewhere in the record that the project may have a significant effect on the environment. *Parker Shattuck Neighbors v. Berkeley City Council* (2013) 222 Cal.App.4th 768, 785. In such a situation, the agency must adopt a negative declaration. PRC, § 21080, subd. (c)(1); CEQA Guidelines, §§ 15063 (b)(2), 15064(f)(3).

“Significant effect upon the environment” is defined as “a substantial or potentially substantial adverse change in the environment.” PRC, § 21068; CEQA Guidelines, § 15382. A project may have a significant effect on the environment if there is a reasonable probability that it will result in a significant impact. *No Oil, Inc.*, 13 Cal.3d at p. 83 fn. 16; see *Sundstrom v. County of Mendocino* (1988) 202 Cal.App.3d 296, 309. If any aspect of the project may result in a significant impact on the environment, an EIR must be prepared even if the overall effect of the project is beneficial. CEQA Guidelines, § 15063(b)(1); see *County Sanitation Dist. No. 2 v. County of Kern* (2005) 127 Cal.App.4th 1544, 1580.

This standard sets a “low threshold” for preparation of an EIR. *Consolidated Irrigation Dist. v. City of Selma* (2012) 204 Cal.App.4th 187, 207; *Nelson v. County of Kern* (2010) 190 Cal.App.4th 252; *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 928; *Bowman v. City of Berkeley* (2004) 122 Cal.App.4th 572, 580; *Citizen Action to Serve All Students v. Thornley* (1990) 222 Cal.App.3d 748, 754; *Sundstrom*, 202 Cal.App.3d at p. 310. If substantial evidence in the record supports a fair argument that the project may have a significant environmental effect, the lead agency must prepare an EIR even if other substantial evidence before it indicates the project will have no significant effect. See *Jensen*, 23 Cal.App.5th at p. 886; *Clews Land & Livestock v. City of San Diego* (2017) 19 Cal.App.5th 161, 183; *Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 150; *Brentwood Assn. for No Drilling, Inc. v. City of*

*Los Angeles* (1982) 134 Cal.App.3d 491; *Friends of “B” St.*, 106 Cal.App.3d 988; CEQA Guidelines, § 15064(f)(1).

## 2. *Background Regarding Sustainable Communities Environmental Assessments*

To achieve its objectives of environmental protection, CEQA has a three-tiered structure. CEQA Guidelines § 15002(k); *Comm. to Save the Hollywoodland Specific Plan v. City of Los Angeles* (2008) 161 Cal.App.4th 1168, 1185 – 86. First, if a project falls into an exempt category, or it can be seen with certainty that the activity in question will not have a significant effect on the environment, no further agency evaluation is required. *Id.* Second, if there is a possibility the project will have a significant effect on the environment, the agency must perform a threshold initial study. *Id.*; CEQA Guidelines § 15063(a). If the study indicates that there is no substantial evidence that the project may cause a significant effect on the environment the agency may issue a negative declaration. *Id.*, CEQA Guidelines §§ 15063(b)(2), 15070. Finally, if the project will have a significant effect on the environment, an EIR is required. *Id.*

Where a Project is determined to be a “Transit Priority Project” (“**TPP**”) under Senate Bill (“**SB**”) 375, a slightly different framework is applied. SB 375 provides CEQA-based incentives and streamlining for certain residential, mixed-use, and transportation-oriented developments. SB 375 includes two optional CEQA streamlining options for local lead agencies.

First, under SB 375, residential and mixed-use projects that (1) are consistent with the use designation, density, building intensity, and applicable policies specified in a California Air Resources Board (“**CARB**”)-approved sustainable communities strategy (“**SCS**”) or alternative planning strategy (“**APS**”) and (2) incorporate mitigation measures required by an “applicable prior environmental document,” which may include the environmental impact report for the regional transportation plan, need not reference, describe or discuss growth-inducing impacts or project-specific or cumulative impacts on global warming or on the regional transportation network arising from automobiles or light-duty truck trips generated by the Project. PRC §21159.28(a).

Second, TPPs consistent with the SCS or APS may qualify for a total CEQA exemption or a Sustainable Communities Environmental Assessment. PRC §§ 21155.1-21155.2. A TPP is a specific project that must (1) be consistent with a CARB-approved SCS or APS; (2) contain at least 50 percent residential use, and if the project

contains between 26 percent and 50 percent nonresidential uses, then a floor area ratio of not less than 0.75, (3) have a minimum net density of 20 units per acre; and (4) be located within one-half mile of a major transit stop or high-quality transit corridor included in a regional transportation plan. PRC § 21155.

A TPP may be reviewed through a SCEA provided, inter alia, that (1) an initial study identifies “all significant or potentially significant impacts of the transit priority project... based on substantial evidence in light of the whole record” PRC § 21155.2(b)(1); (2) the SCEA shall contain “measures that either avoid or mitigate to a level of insignificance all potentially significant or significant effects of the project required to be identified in the initial study” PRC § 21155.2(b)(2); and (3) “the lead agency's decision to review and approve a transit priority project with a sustainable communities environmental assessment” is “reviewed under the substantial evidence standard” PRC § 21155.2(b)(7). A SCEA is similar to a negative declaration in that the lead agency must identify and analyze all potentially significant or significant effects of the project and mitigate them to a level of less than significant.

Prior to acting on the SCEA, a lead agency must consider all comments received. PRC § 21155.2(b)(4) A SCEA may be approved by the lead agency after conducting a public hearing, reviewing the comments received, and finding that: (A) all potentially significant or significant effects required to be identified in the initial study have been identified and analyzed, (B) with respect to each significant effect on the environment required to be identified in the initial study, either of the following apply: (i) changes or alterations have been required in or incorporated into the project that avoid or mitigate the significant effects to a level of insignificance, and (ii) those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency. PRC §21155.2(b)(5).

B. The SCEA Omits Information and Fails to Support its Findings on Air Quality Impacts with Substantial Evidence.

Sensitive receptors are more susceptible to the effects of air pollution than the general population. SCEA at 92. The sensitive receptors closest to the Project “that could potentially be subject to localized air quality impacts associated with construction of the Project would be existing multi-family residences that are located on adjacent properties to the north of the Project Site.” *Id.* The SCEA admits that during the construction phase of the Project, discernible odors may be produced from the application of architectural coatings and other interior and exterior finishes, paving, or

other construction activities. SCEA at 93. However, the SCEA fails to discuss the extent of such odors including its anticipated duration and potency. It also fails to discuss any mitigation measures to alleviate such odors to nearby sensitive receptors. It simply evades the discussion and states that “[s]uch odors would be temporary based on the limited duration of each construction phase.” *Id.* It concludes that on this basis, “the Project’s potential to emit objectionable odors affecting a substantial number of people during construction...would be less than significant.” *Id.* The SCEA should be revised to incorporate a more comprehensive discussion fleshing out the extent of odors that will affect nearby sensitive receptors as well as mitigation measures to alleviate such impacts.

C. The SCEA Omits Information and Fails to Support its Findings on Biological Resources Impacts with Substantial Evidence.

The SCEA states that “bird species common to urban areas would potentially nest in the trees present on site during nesting season” but fails to elaborate on whether any active nests are found in the trees onsite, what types of birds may nest, and whether such birds are migratory birds. SCEA at 95. Moreover, the City failed to conduct a bird survey that would otherwise determine the same.

The SCEA continues: “Common wildlife, particularly birds, may be exposed to noise and other disturbance during construction but these activities are typical of urban environments.” *Id.* Again, the SCEA fails to provide any more details about what types of birds these might be, how they might be affected, or any mitigation measures to alleviate impacts to such birds. Instead, the SCEA evades any such discussion and concludes that common wildlife species would not be affected because they are already “acclimated to these types of disturbances.” *Id.* It reads: “Species likely to occur within the site under the existing conditions would be those that are typically acclimated to these types of disturbances in highly urbanized environments; thus, most introduced disturbances, aside from removal of vegetation or ground disturbance, would likely not negatively affect common wildlife species.” *Id.* Stating that species likely to be present onsite will not be affected because they are already acclimated to disturbances improperly evades any substantive analysis.

Moreover, the SCEA proposes a nesting bird survey to be conducted prior to the removal of any onsite trees and shrubs, “if such activities would occur during the nesting season.” SCEA at 96. It states that “compliance with City Regulatory Compliance Measure RCM-BIO-1 would provide protection to potential nesting

birds” in part by “propos[ing] project activities (including disturbances to native and non-native vegetation, structures, and substrates)...take place outside of nesting bird seasons, which generally runs from March 1 – August 31 (as early as February 1 for raptors) to avoid take (including disturbances which would cause abandonment of active nests containing eggs and/or young).” SCEA at 96.

As noted by the California Department of Fish and Wildlife in a November 18, 2021 letter to the City of Adelanto concerning a similar preconstruction nesting bird survey mitigation measure:

CDFW is concern[ed] that [the mitigation measure] is conditioned to only require surveys during the peak bird nesting season considering that birds, such as hummingbirds may nest year-round. Furthermore, [the mitigation measure] defines bird nesting season as February 1 to August 31. Please note that nesting may commence before and/or after this timeframe. For example, some species of raptors (e.g. owls, hawks, etc.) may commence nesting activities in January, and passerines may nest later than August 31. Fish and Game Code Section 3503 makes it unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as otherwise provided by Fish and Game Code or any regulation made pursuant thereto.

Accordingly, the SCEA should be revised to require that prior to construction of the Project, a sweep should be conducted verifying the absence of any nesting birds during both nesting and non-nesting seasons. Likewise, given that the Project construction and operation will span all seasons, times of day, and weather conditions, and without a comprehensive assessment of the wildlife present onsite, the SCEA’s discussion and analysis of potential wildlife, including birds, onsite is flawed and must assess the Project site during varying spans of time and conditions before the SCEA can draw a conclusion about the Project’s impacts on wildlife species.

D. The SCEA Omits Information and Fails to Support its Findings on Energy Impacts with Substantial Evidence.

The SCEA states that the Project’s construction activities will involve heavy duty equipment associated with demolition, site preparation, grading, paving, architectural coating, and building. SCEA at 107. Such construction equipment will include excavators, graders, dozers, scrapers, air compressors, cranes, forklifts, generators,

welders, rollers, pavers, and tractors equipped with front end loaders and backhoes. *Id.* “Construction also involves trucks for material and supplies delivery, as well as powered hand tools, including concrete saws. The majority of the equipment would likely be diesel-fueled. However, smaller equipment such as welders may be electric, gasoline, or natural gas-fueled, and tower cranes would likely be powered by electricity.” *Id.*

The Project’s construction activities are estimated to consume a total of approximately 91,881 gallons of diesel fuel and approximately 50,148 gallons of gasoline based on the U.S. Energy Information Administration fuel consumption factors and the Project’s estimated total CO2 emissions presented in the CalEEMod output sheets. SCEA at 108. The SCEA claims that its energy usage, including the use of construction equipment, transportation of materials, and workers necessary for Project construction would not represent a substantial proportion of annual gasoline or diesel fuel use in California because “12.38 billion gallons of gasoline were sold in California, and in 2015 4.2 billion gallons of diesel, including off-road diesel, were sold in California.” *Id.* The SCEA draws a conclusion that the Project will not needlessly consume energy during the Project’s construction on the basis of the amount of gasoline and diesel that were sold in California. Such conclusion is wholly lacking in any project-specific analysis about whether such use of energy, including gasoline and diesel, are in excess of what is necessary to complete the Project and would therefore otherwise constitute waste. A project can still be considered wasteful while only amounting to a small fraction of California’s energy consumption; the fact that it amounts to a small fraction of California’s energy consumption is insufficient to conclude that the Project will not be wasteful in its energy consumption.

The SCEA also states that, during the Project’s operations, by being required to comply with applicable regulations and energy efficient programs implemented by the LADWP, “the Project’s potential impacts regarding wasteful or inefficient use of electricity energy supplies would be less than significant.” SCEA at 109. For example, it states that the Project would be required to comply with the CALGreen Code. However, it fails to state which code would be applicable, and how such code would render this specific Project to operate without significant energy impacts. Similarly, the SCEA reads that “[t]he LADWP has increased renewable energy through active procurement of renewable resources included in the Renewable Portfolio Standard (RPS) and the Strategic Long-Term Resource Planning, which specifies a roadmap for

providing reliable and sustainable electricity use to customers through 2050,” and that by complying with such program, the potential Project impacts would be less than significant. SCEA at 108-109. Again, it is not clear how compliance with such a program would render the Project’s impacts insignificant.

The SCEA relies solely upon required regulatory measures in concluding that the Project will not cause significant energy impacts. However, determinations that regulatory compliance will be sufficient to prevent significant adverse impacts must be based on a project-specific analysis of potential impacts and the effect of regulatory compliance. *See Californians for Alternatives to Toxics v. Department of Food & Agric.* (2005) 136 Cal. App. 4th 1; *Ebbetts Pass Forest Watch v Department of Forestry & Fire Protection* (2008) 43 Cal. App. 4th 936, 956. Because the SCEA is relying on regulatory measures in its determination that the Project would have a less than significant impact, but such regulatory measures are not clearly identified in the SCEA and are therefore unenforceable, the SCEA omits pertinent information and should be revised to include more detailed analysis. Therefore, the SCEA cannot rely upon regulatory compliance in making its less than significant impact determination without assessing and providing Project specific information.

E. The SCEA Omits Information and Fails to Support its Findings on Geology and Soils Impacts with Substantial Evidence.

The SCEA similarly fails to provide a project specific analysis based on its reliance on regulatory measures in its conclusion that there will be a less than significant impact regarding seismically induced ground shaking hazards. The SCEA makes clear that the Project Site is located within a seismically active region and that several active and potentially active faults within the Los Angeles Basin area could affect the Project Site, such as the Puente Hills Blind Thrust Fault. SCEA at 111. It also states that “is it likely that future earthquakes will shake the subject property.” *Id.*

The Project Site is classified as within Seismic Design Category Class E, based on the 2019 California Building Code (“**CBC**”) and thus the Project will be subject to the applicable structural regulations in the CBC that address that classification. *Id.* The SCEA states that “the requirements for foundation and structural design will change according to the class in order to compensate for less or more anticipated ground-shaking.” *Id.* However, the SCEA does not lay out what the requirements for the foundation will be and how the applicable requirements will compensate for less ground-shaking.

The SCEA concludes: “As the Project Site has been found to be suitable for construction, and the applicant is required to design and construct the Project in conformance to the most recently adopted LAMC, which includes CBC requirements for Seismic Design Category Class E structures, and is required to implement all of the approval conditions contained in the Soils Report Approval Letter (Appendix G), and to implement applicable recommendations made in the Geotechnical Investigation (Appendix F), the Project would have less than significant impacts regarding seismically induced ground shaking hazards.” However, it fails to identify or set forth the contents of any of the applicable laws that it will comport with in order to ensure the safety regarding seismically induced ground shaking hazards.

As previously stated, determinations that regulatory compliance will be sufficient to prevent significant adverse impacts must be based on a project-specific analysis of potential impacts and the effect of regulatory compliance. *See Californians for Alternatives to Toxics v. Department of Food & Agric.* (2005) 136 Cal. App. 4th 1; *Ebbetts Pass Forest Watch v Department of Forestry & Fire Protection* (2008) 43 Cal. App. 4th 936, 956. Therefore, the SCEA cannot rely upon regulatory compliance in making its less than significant impact determination without assessing and providing a Project-specific analysis as to the Project’s direct or indirect cause of potential substantial adverse effects, including the risk of loss, injury, or death, involving strong seismic ground shaking.

F. The SCEA Omits Information and Fails to Support its Findings on Hazards and Hazardous Materials Impacts with Substantial Evidence.

The SCEA lacks an adequate analysis of whether the Project would create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. During the Project’s construction, hazardous materials would be used and transported to and from the Project site. SCEA at 122. Such materials include paints, solvents, fuels for construction equipment, building materials, and the like. *Id.* The SCEA is devoid of any further details including the amount and handling frequency of such items or methods by which such items will be safely stored and handled. It simply states that “construction activities associated with Project would be temporary and required to comply with all applicable federal, state, and local regulations governing such activities.” SCEA at 123. It also states that “[t]he Project would follow all related requirements set forth by the California Environmental Protection Agency’s Department of Toxic and Substance Control, Cal/OSHA and the

Los Angeles Regional Water Quality Control Board regarding the transport, use and disposal of hazardous waste, construction activities.” *Id.* Deferring such critical analysis to after the Project is approved does not comport with CEQA. *See San Joaquin Raptor Rescue Center v. County of Merced* (2007) 149 Cal. App. 4th 645 (mitigation measures requiring future surveys and management plans for listed wildlife species improperly deferred analysis and rendered an EIR inadequate); *see also Preserve Wild Santee v. City of Santee* (2012) 210 Cal. App. 4th 260 (found an impermissible deferral of mitigation to address a protected species, the Quino checkerspot butterfly). The City should be required to provide such information before the Project can proceed.

The SCEA does not describe any potential mitigation measures to prevent or lower risks from such hazardous materials to human health and the environment, and instead only relies on regulatory compliance without the requisite Project-specific analysis. Without an adequate analysis of what the Project operations will entail, including what measures the Applicant will propose to protect employees, visitors, and the natural environment from foreseeable spills and accidents in the transport, handling, use, and processing of such hazardous materials, the City lacks substantial evidence to support its findings in the SCEA.

#### IV. CONCLUSION

The Project development should implement local hire and skilled-and-trained workforce policies. It should also impose training requirements for the Project’s construction activities in an effort to prevent community spread of COVID-19 and other infectious diseases. The SCEA should be recirculated because it fails to support its findings on air quality, biological resources, energy, geology and soils, and hazards and hazardous materials with substantial evidence.

**Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling**

---

Dear Mr. Tsai,

Soil Water Air Protection Enterprise ("SWAPE") is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas ("GHG") emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

### Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model ("CalEEMod") is a "statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects."<sup>1</sup> CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.<sup>2</sup>

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.<sup>3</sup>

---

<sup>1</sup> "California Emissions Estimator Model." CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

<sup>2</sup> "California Emissions Estimator Model." CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

<sup>3</sup> "CalEEMod User's Guide." CAPCOA, November 2017, available at: [http://www.aqmd.gov/docs/default-source/caleemod/01\\_user-39-s-guide2016-3-2\\_15november2017.pdf?sfvrsn=4](http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4), p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.<sup>4</sup>

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i) _n$$

Where:

$n$  = Number of land uses being modeled.”<sup>5</sup>

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$  = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$  = emission factor for running emissions.”<sup>6</sup>

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

## Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.<sup>7</sup> In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.<sup>8</sup> The default number of construction-related worker trips is calculated by multiplying the

<sup>8</sup> CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.<sup>9</sup> Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”<sup>10</sup> Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.<sup>11</sup> The operational home-to-work vehicle trip lengths are:

“[B]ased on the location and urbanization selected on the project characteristic screen. These values were supplied by the air districts or use a default average for the state. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).<sup>12</sup>

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).<sup>13</sup>

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8

<sup>11</sup> “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: [http://www.aqmd.gov/docs/default-source/caleemod/02\\_appendix-a2016-3-2.pdf?sfvrsn=6](http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6), p. 14.

<sup>12</sup> “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: [http://www.aqmd.gov/docs/default-source/caleemod/02\\_appendix-a2016-3-2.pdf?sfvrsn=6](http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6), p. 21.

<sup>13</sup> “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: [http://www.aqmd.gov/docs/default-source/caleemod/05\\_appendix-d2016-3-2.pdf?sfvrsn=4](http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4), p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8- miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7- miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

### Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.<sup>14</sup> In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
<b>Without Local Hire Provision</b>	
Total Construction GHG Emissions (MT CO <sub>2</sub> e)	3,623
Amortized Construction GHG Emissions (MT CO <sub>2</sub> e/year)	120.77
<b>With Local Hire Provision</b>	
Total Construction GHG Emissions (MT CO <sub>2</sub> e)	3,024
Amortized Construction GHG Emissions (MT CO <sub>2</sub> e/year)	100.80
<b>% Decrease in Construction-related GHG Emissions</b>	<b>17%</b>

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

<sup>14</sup> “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: [http://www.aqmd.gov/docs/default-source/caleemod/05\\_appendix-d2016-3-2.pdf?sfvrsn=4](http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4), p. D-85.

### 1.3 User Entered Comments & Non-Default Data

## Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

### 1.3 User Entered Comments & Non-Default Data

## Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

### 1.3 User Entered Comments & Non-Default Data

## Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

### 1.3 User Entered Comments & Non-Default Data

## Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

### 1.3 User Entered Comments & Non-Default Data

## Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

## **EXHIBIT B**

---

## ***Paul Rosenfeld, Ph.D.***

*Principal Environmental Chemist*

**Chemical Fate and Transport & Air Dispersion Modeling**

**Risk Assessment & Remediation Specialist**

### **Education**

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

### **Professional Experience**

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

## **Professional History:**

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner  
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)  
UCLA School of Public Health; 2003 to 2006; Adjunct Professor  
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator  
UCLA Institute of the Environment, 2001-2002; Research Associate  
Komex H<sub>2</sub>O Science, 2001 to 2003; Senior Remediation Scientist  
National Groundwater Association, 2002-2004; Lecturer  
San Diego State University, 1999-2001; Adjunct Professor  
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager  
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager  
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor  
King County, Seattle, 1996 – 1999; Scientist  
James River Corp., Washington, 1995-96; Scientist  
Big Creek Lumber, Davenport, California, 1995; Scientist  
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist  
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

## **Teaching Experience:**

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

## **Academic Grants Awarded:**

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

## **Deposition and/or Trial Testimony:**

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS “Conti Perdido”  
*Defendant*.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112<sup>th</sup> Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosiences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish  
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants  
Case No.: No. 13-2-03987-5  
Rosenfeld Deposition, February 2017  
Trial, March 2017

In The Superior Court of the State of California, County of Alameda  
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants  
Case No.: RG14711115  
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County  
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants  
Case No.: LALA002187  
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County  
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants  
Law No.: LALA105144 - Division A  
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County  
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants  
Law No.: LALA105144 - Division A  
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia  
Robert Andrews, et al. v. Antero, et al.  
Civil Action NO. 14-C-30000  
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico  
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward  
DeRuyter, Defendants  
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County  
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant  
Case No 4980  
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17<sup>th</sup> Judicial Circuit, in and For Broward County, Florida  
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.  
Case Number CACE07030358 (26)  
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma  
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City  
Landfill, et al. Defendants.  
Case No. 5:12-cv-01152-C  
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas

Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.

Case Number cc-11-01650-E

Rosenfeld Deposition: March and September 2013

Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio

John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*

Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)

Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division

Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.

Case 3:10-cv-00622

Rosenfeld Deposition: February 2012

Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland

Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants

Case Number: 03-C-12-012487 OT

Rosenfeld Deposition: September 2013

**Geologic and Hydrogeologic Characterization  
Industrial Stormwater Compliance  
Investigation and Remediation Strategies  
Litigation Support and Testifying Expert  
CEQA Review**

**Education:**

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

**Professional Certifications:**

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

**Professional Experience:**

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

**Senior Regulatory and Litigation Support Analyst:**

With SWAPE, Matt’s responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt’s duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

### **Executive Director:**

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

### **Hydrogeology:**

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

### **Policy:**

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

### **Geology:**

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

### **Teaching:**

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

### **Invited Testimony, Reports, Papers and Presentations:**

**Hagemann, M.F.**, 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

**Hagemann, M.F.**, 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

**Hagemann, M.F.**, 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Colorado.

**Hagemann, M.F.**, 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

**Hagemann, M.F.**, 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

**Hagemann, M.F.**, 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

**Hagemann, M.F.**, 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

**Hagemann, M.F.**, 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

**Hagemann, M.F.**, 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal representatives, Parker, AZ.

**Hagemann, M.F.**, 2003. Impact of Perchlorate on the Colorado River and Associated Drinking Water Supplies. Invited presentation to the Inter-Tribal Meeting, Torres Martinez Tribe.

**Hagemann, M.F.**, 2003. The Emergence of Perchlorate as a Widespread Drinking Water Contaminant. Invited presentation to the U.S. EPA Region 9.

**Hagemann, M.F.**, 2003. A Deductive Approach to the Assessment of Perchlorate Contamination. Invited presentation to the California Assembly Natural Resources Committee.

**Hagemann, M.F.**, 2003. Perchlorate: A Cold War Legacy in Drinking Water. Presentation to a meeting of the National Groundwater Association.

**Hagemann, M.F.**, 2002. From Tank to Tap: A Chronology of MTBE in Groundwater. Presentation to a meeting of the National Groundwater Association.

**Hagemann, M.F.**, 2002. A Chronology of MTBE in Groundwater and an Estimate of Costs to Address Impacts to Groundwater. Presentation to the annual meeting of the Society of Environmental Journalists.

**Hagemann, M.F.**, 2002. An Estimate of the Cost to Address MTBE Contamination in Groundwater (and Who Will Pay). Presentation to a meeting of the National Groundwater Association.

**Hagemann, M.F.**, 2002. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to a meeting of the U.S. EPA and State Underground Storage Tank Program managers.

**Hagemann, M.F.**, 2001. From Tank to Tap: A Chronology of MTBE in Groundwater. Unpublished report.

**Hagemann, M.F.**, 2001. Estimated Cleanup Cost for MTBE in Groundwater Used as Drinking Water. Unpublished report.

**Hagemann, M.F.**, 2001. Estimated Costs to Address MTBE Releases from Leaking Underground Storage Tanks. Unpublished report.

**Other Experience:**

Selected as subject matter expert for the California Professional Geologist licensing examination, 2009-2011.
