Comments for Public Posting: Respectfully, well, I am thankful that the great city of Los Angeles is beginning to fall in line with our states' posture of moving away from an emergency/pandemic, state of emergency, and into a state of heightened care for the good of the people, I believe it is well time for our city to end all unnecessary and on scientific mandates regarding COVID-19. While very little was known about this virus at the beginning, approximately three years now, there is overwhelming statistical data from the CDC and other authorized government health agencies to no longer believe that it is either scientific or necessary to continue these mandates within our city. Clearly vaccines for Covid VAX, neither guarantee immunity, but most importantly, do not prevent spread. Scientifically and therefore Morally speaking, there is no reason to require such a vaccine under the pretense is a public safety. According to the CDC Data, this vaccine cannot enhance the safety of others. Though I believe in and support ANYONE who willingly vaccinates... I also support their assertion of "my body - my choice!" To include ANY medical decision or refusal of treatment. VAERS data for this vaccine show heightened risk for various issues including blood clots / heart related issues. Not conspiracy theories, federally tracked and updated data only is my source. Three years later, along with vast losses to careers, business and loss of life...there has been the loss of freedoms and personal liberties... we now have sufficient data to know that these mandates are NOT necessary. Additionally and most concerning, the intrusions into the constitutional rights of the individual citizen are not warranted, not supported by data or science. I respectfully request that this /all mandates for COVUD 19/ end immediately and without ANY portions of the mandates to "remain" in effect.

Comments for Public Posting: End vaccine mandate for all city employees. The CDC states the vaccine does not prevent transmission, or hospitalization or death. In effect it is a sugar pill. Body autonomy is written into the California Constitution. Follow the constitution. Rehire all employees that were fired. Make a public apology for the harm you have done to the employees, to the business and to the children of this city.
