**Comments for Public Posting:** Please move FORWARD with the Lincoln Blvd multi modal bridge improvement project! This area desperately needs pedestrian, bike & transit infrastructure. From marina del Rey to playa vista along Lincoln Blvd there isn't even sidewalk people are forced to walk in dirt, debris & trash along speeding cars that do not care if they hit us. Also there is traffic on Lincoln 24/7 we need dedicated transit lanes ASAP & BBB should provide improved rapid service on their buses! Work together please! This area is on the borders of LA city, unincorporated LA county, Santa Monica and Culver City & we all need to work together to make it better!! So many people live in the dense buildings along Lincoln in the marina to playa vista to Venice to Santa Monica & LAX and would love to be able to get to those places without a car. I am a regular walker biker and bus rider and can clearly see our people are begging for improvements. We don't need an 8 lane super highway diving our neighborhood! Make changes that will benefit everyone not just those who have the luxury of driving a private vehicle! There is so much potential for this area just act fast and whip out the paint buckets!! Lincoln is already reduced one lane by Mindanao for hospital construction & the world didn't end. Two car lanes is plenty!! Give transit riders & bikers the space in the city they deserve! We can't rely on cars as the only means of transportation bc clearly adding another lane has not helped & only hurt our community. Also Traci Park claimed she was a bike rider throughout her whole campaign please don't block, delay or stop this project you should know biking on Lincoln as it is currently is a death sentence! I live on the corner of Lincoln & mindano and see car crashes almost daily. Drivers have no respect for our community and just want to go as fast as possible with no regard for their surroundings. Please lower the speed limits, narrow the lanes and protect the people you promised to serve!!!! BRT/LRT ON LINCOLN NOWW WE CANNOT WAIT TIL 2047

**Comments for Public Posting:** Lincoln Blvd needs to be improved for multi-modal use. This city is choking us to death with car pollution and reports higher levels of pedestrians deaths than almost any other city. It is critical we have an improved north-south connection bridge that prioritizes ALL modes of transit. Please don't delay the advancement of this project. I want our city's children to know they can walk and bike on streets like Lincoln Blvd.

**Council File No:** 19-0453-S2

**Comments for Public Posting:** Lincoln Blvd is a critical north-south arterial. The bridge needs to be updated to accomodate bikes/wheelchairs/scooters/rollerbladers safely, This needs to happen ASAP given climate change issues. This project will improve walkability and bikeability on Lincoln Blvd.
