**Comments for Public Posting:** As a resident of Bel Air, I strongly believe that Senderos Canyon should be preserved as pristine open space for LA's wildlife. Anything the City of Los Angeles can do to prevent this invaluable natural resource from development would be a victory for the local ecosystem and for the city's environmental health at large. LA desperately needs every last acre of its dwindling wild areas. What it does not need is any further incursion of any type into its unspoiled habitats.
