Re: Support for Los Angeles City Council File Number 23-1029 Save Senderos Canyon

As both public educators and local residents, we urge your support of Los Angeles City Councilmember Katy Yaroslavsky's motion to determine available strategies to preserve the 260-acre Senderos Canyon property (also known as Hoag Canyon) and to identify various options to fund the purchase of the property, including potential County, State, and Federal funding sources. The Santa Monica Mountains Conservancy [calls this land](#) one of the most ecologically significant properties in the City of Los Angeles, and says that the Canyon's natural values contribute greatly to the Eastern Santa Monica Mountains ecosystem.

We support the acquisition of this land for the following reasons:

- Saving this open space would further the Governor's [30x30](#) goal of conserving 30% of California's land and coastal waters by 2030 and President Biden's [America the Beautiful](#) initiative to help combat the global climate and biodiversity crisis.
- The Santa Monica Mountains Conservancy adopted a [resolution](#) calling this property one of the most regionally significant unprotected habitat areas within the Santa Monica Mountains range, which contains the most ecologically significant riparian corridor in the Santa Monica Mountains east of the 405 freeway.
- The recent attention on P-22's death and his isolated existence in Griffith Park highlights the problems associated with habitat fragmentation and loss of connectivity.
- Preservation of Hoag Canyon will ensure habitat linkage between the Big Wild and Griffith Park extending the Westridge-Canyonback Wilderness Park and the greater Santa Monica Mountains nature preserve managed by the SMMC and MRCA.
- According to the City's 2022 [Biodiversity Index Baseline Report](#), just over 20% of the City of Los Angeles is classified as natural (95.48 square miles out of 470.85 square miles in the City). For the baseline assessment of the Index, the City received a score of 37 out of a possible 110 points, indicating that substantial work remains to be done if the City aims to effectively protect and enhance biodiversity and take appropriate action to halt biodiversity loss.
- Saving this canyon would protect important cultural resources, preserving our shared cultural resources in the State.
- Saving one of the last remaining perennial streams in the City would preserve watershed health, protecting aquatic and terrestrial species.
- Development of the canyon would negatively impact large-scale community health by reducing carbon storage (climate risk), increasing heat island effects, increasing flood and debris-flow hazards, worsening air quality, and eliminating a source of groundwater recharge.

- Preserving this land as open space will protect against wildfire risk. According to experts 95-97% of all wildfires in California's Mediterranean regions are caused by humans or human infrastructure in the wildland urban interface.
- This is a once-in-a-lifetime opportunity to save what little open space Los Angeles has left.

We urge our Federal, State and local representatives to do everything they can to find the resources needed to purchase this important open space.

Thank you,

Sir/Madam:

I strongly urge your support of Los Angeles City Councilmember Katy Yaroslavsky's motion to determine available strategies to preserve the 260-acre Senderos Canyon property and to identify various options to fund the purchase of the property, including potential County, State, and Federal funding sources.

This beautiful canyon is an iconic reserve of nature and greatly contributes to the Santa Monica ecosystem. I support the acquisition and natural preservation of this canyon:

- California needs to conserve its remaining natural landscape from further development - especially in Los Angeles County.
- As a resident of LA, I treasure our natural landscape when I can still "find it".
- I don't want to have to travel to Utah to see "nature".
- This canyon is the home to a variety of surviving wild and greenery that I treasure.
- This is a once-in-a-lifetime opportunity to save what little open space Los Angeles has left.

I urge my Federal, State and local representatives to do everything they can to find the resources needed to purchase this important open space.

Thank you,

Jacqueline Stafsudd  
Resident: [2397 Nalin Dr, Los Angeles 90077](#)

Claude Rush <clauder@thetstuntman.com>  
To: Clerk.CPS@lacity.org

Fri, Mar 10, 2023 at 3:25 PM

March 10, 2023

To Whom It May Concern,

My name is Claude Rush, I've lived in the hills (821 Stradella Rd., L.A. Ca. 90077) since 1977. Over the last few years I have witnessed the destruction of our peaceful neighborhoods. Greed has invaded our hills and they are being raped by powerful foundation drilling equipment that allows developers to build mega mansions on lots which are the size of postage stamps without taking into account the negative effect that these constructions have on the environment. It is so sad to see these beautiful rolling hills, home to all our California wildlife, replaced by rows of cement rectangles with sliding doors labeled as houses.

**I THINK THAT THE PURCHASE THE 260 ACRES SENDEROS CANYON BY THE CITY IS A BRILLIANT, EXCELLENT IDEA.**

FINANCIALLY, THE CITY IS CAPABLE TO PURCHASE THESE 260 ACRES OF NATURAL UNDISTURBED OPEN SPACE. PLEASE, **I BEG YOU, DO IT!** LET'S TRY TO KEEP THIS LAND INTACT! IT WOULD BE CRIMINAL TO LET IT FALL INTO UNSCRUPULOUS DEVELOPERS' HANDS! AT THE MOMENT, THEY ARE ROLLING UP THEIR SLEEVES, WHILE CALCULATING HOW MUCH PROFIT THEY WILL GET FROM THE DESTRUCTION OF THIS UNIQUE IRREPLACEABLE PIECE OF LAND. WE DO NOT NEED ANOTHER GOLF COURSE, WE DO NOT NEED ANYMORE MEGA MANSIONS PURCHASED BY FOREIGNERS, WE NEED TO RESPECT THE NATURAL BEAUTY OF OUR NEIGHBORHOOD, OUR WILDLIFE. AND WE CERTAINLY DON'T NEED HAVOC FOR YEARS TO COME! I AM SURE THAT THE CITY CAN FIND THE FUNDS NECESSARY FOR THE PURCHASE. I WILL BE ETERNALLY GRATEFUL TO ALL OF YOU FOR SUPPORTING KATY YAROSLAVSKY'S MOTION, AND IT WILL MAKE ME SO PROUD TO BE AN ANGELENO!

I am a fervent supporter of The Santa Monica Mountains Conservancy. It is not by accident that they call this land one of the most ecologically significant properties in the City of Los Angeles, and says that the Canyon's natural values contribute greatly to the Eastern Santa Monica Mountains ecosystem. I am 100% in agreement with them.

- Saving this open space would further the Governor's 30x30 goal of conserving 30% of California's land and coastal waters by 2030 and President Biden's America the Beautiful initiative to help combat the global climate and biodiversity crisis.
- The Santa Monica Mountains Conservancy adopted a resolution calling this property one of the most regionally significant unprotected habitat areas within the Santa Monica Mountains range, which contains the most ecologically significant riparian corridor in the Santa Monica Mountains east of the 405 freeway.

- The recent attention on P-22's death and his isolated existence in Griffith Park highlights the problems associated with habitat fragmentation and loss of connectivity.
- Preservation of Hoag Canyon will ensure habitat linkage between the Big Wild and Griffith Park extending the Westridge-Canyonback Wilderness Park and the greater Santa Monica Mountains nature preserve managed by the SMMC and MRCA.
- According to the City's 2022 Biodiversity Index Baseline Report, just over 20% of the City of Los Angeles is classified as natural (95.48 square miles out of 470.85 square miles in the City). For the baseline assessment of the Index, the City received a score of 37 out of a possible 110 points, indicating that substantial work remains to be done if the City aims to effectively protect and enhance biodiversity and take appropriate action to halt biodiversity loss.
- Saving this canyon would protect important cultural resources, preserving our shared cultural resources in the State.
- Saving one of the last remaining perennial streams in the City would preserve watershed health, protecting aquatic and terrestrial species.
- Development of the canyon would negatively impact large-scale community health by reducing carbon storage (climate risk), increasing heat island effects, increasing flood and debris-flow hazards, worsening air quality, and eliminating a source of groundwater recharge.
- Preserving this land as open space will protect against wildfire risk. According to experts 95-97% of all wildfires in California's Mediterranean regions are caused by humans or human infrastructure in the wildland urban interface.
- This is a once-in-a-lifetime opportunity to save what little open space Los Angeles has left.

THANK YOU, THANK YOU.

Claude Rush
