**Comments for Public Posting:** This is a General Comment: One of the fundamental issues in USA is gun violence .WHY?How did this happen?What did you do about it ? Nothing .....you have done nothing . Science and research shows human brain fully developed by the age of 27. can you answer this question ? Firstly,why do you allow people to buy guns when their brain is not even fully developed yet? Second,Do you hire a mental health professional to assess these gun buyers and verify ,they are in good mental health .like they are not Schizophrenic ,Bipolar,Paranoid or Psychopaths . I give you a clear answer when you do not invest in mental health evaluation of gun buyers ,you get people who have Serious mental health issues who purchase these guns and then they are causing what you see as the result ,you see mass shooting. These are immature mental unstable people who create this disaster in this country ,yet you all just sit and watch. families loose their children ,wives,husbands .people die because if this stupid policy.which has not been modified ,it has not been reviewed ,theres no serious action taken place . No one is there to shake you and say : Are these people Mentally stable and they are mature enough to purchase a gun to defend themselves ,while you have Law enforcement's groups to prevent crime and harm to people .Its not enough ????
