**Comments for Public Posting:** Please help! The unchecked new home construction here in Mt. Washington is causing frequent traffic problems, mounting parking problems, and sky rocketing fire policy premiums. Our old narrow hillside trails that became streets can't handle the heavy constant traffic. Over and over there is some variance granted so these developers can ignore required street widening which is vital to driving and living here on the hill. I am a life long resident and can see a situation out of control. Now is time to take that control back and follow the rules, or make new ones. Please represent us. THANK YOU ALL, Kathy Bojorquez

**Comments for Public Posting:** Hi I live on Crane Bl in Mt Washington and am very concerned with the unchecked building going on. Many of our roads up here are not rated for the big equipment that comes with construction building. New construction must widen the road in front of that property. And please please endorse that the crew require some safety measures for helping cars pass when their construction trucks are blocking 2/3 of the road. Help us maintain the beauty that is our community by not over building and following safety measures.

**Comments for Public Posting:** Please vote in favor to control the out of control construction on Mt Washington. Huge houses are being built on small lots, on narrow substandard streets. It is very dangerous! Thank you  
Denise
