Comments for Public Posting: Please overturn the Categorical Exemption from environmental review of the West Pico Drill Site. There seem to be enough irregularities to warrant this action.

Comments for Public Posting: I am a neighbor of the West Pico Blvd facility. I am also a former board member of the local neighborhood council. Neighbors For A Safe Environment has shows a lot of evidence that Pacific Coast Energy Company and the previous owners & operators of the facility have not complied with numerous local laws and previous agreements. I have yet to hear a defense to these allegations from PCEC. There has been an oil spill on the property recently. The facility is very close to homes, schools, houses of worship, etc. The chemicals and emissions pose a risk to all of the residents of the area and our children. The city must allow a CEQA review. We must verify that PCEC has met all the terms of its agreements and that it has complied with the law. If it has, then it has the right to be there. But if not, then it poses risks to our life and our health and it must be brought into compliance or shut down. I support this appeal. Thank you!

Comments for Public Posting: I SUPPORT NASE's APPEAL Unregulated operations at the West Pico drill site are dangerous, and impose an absurd risk on a vast public. There have been numerous "accidents" already that are a function of lax oversight and the abdication of environmental review. Do not forswear your responsibility as representatives of the people, to act in the best interests of the people, by keeping we the people safe. That's why there is a regulatory process: we residents demand its use. Thank you.

Comments for Public Posting: I support the appeal. I oppose the categorical exemption. LA needs to better regulate oil and gas exploration/extraction in our city. Although the ultimate goal is to end all drilling, until that happens it must be regulated fully and for safety. The powerful interests behind exploration/extraction stand opposed to the interests of our community. Thank you.

Comments for Public Posting: I support this appeal. Facts have come to light due to the diligent community research on this topic, and it's clear that reform is urgently required. If regulations are flouted by oil companies, and the City does not adequately enforce its own regulations, neighborhoods suffer devastating health consequences. I urge the City to grant this appeal.
